

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Walter L. Kehres, *Assistant Director for Administration.*

Calvert L. Dedrick, *Coordinator, International Statistics.*

Frank R. Wilson, *Information Assistant to the Director.*

ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* has been published annually for the past 74 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date.

The *Statistical Abstract* is prepared in the office of Morris H. Hansen, Assistant Director for Statistical Standards. This issue was compiled by William Lerner under the direction of Morris B. Ullman, Chief, Statistical Reports Section. Elma D. Beynon is editorial supervisor and Robert L. Rowland assisted in planning.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pp. XII-XV), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information, assisting in the selection and preparation of the material, or otherwise contributing to the preparation of the *Statistical Abstract*.

September 1953.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1953*. (Seventy-fourth edition). Washington, D. C., 1953.

PREFACE

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the industrial, social, political, and economic organization of the United States. It includes a representative selection of data from most of the important statistical publications, both governmental and private. It is limited, of necessity, primarily to national data, and, to a much lesser extent, to data for regions and individual States. Data for cities or other small geographic units are shown only in a small number of instances.

This book is designed to fulfill two functions: First, to serve as a convenient volume of statistical reference; and second, to serve as a guide to other statistical publications and sources. The source of each table presented is given at the foot of the table. The publications cited usually contain additional statistical detail relating to the subject matter shown, and a more complete discussion of relevant definitions and concepts than can be presented here. Also, they may supply data for smaller geographic units. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished publications and records.

1953 edition.—This edition is the seventy-fourth annual issue. The statistics shown are the latest which were available in the early part of the 1953 calendar year: the year, 1953, used to designate this edition, represents both the year during which compilation was made and the year of publication.

Each year several sections are subjected to intensive review. This review introduces new subject material of current interest and eliminates data that are less timely or appear in greater detail than seems warranted.

Worthy of special mention in this edition is the presentation of new data from the 1950 Censuses of Population, Housing, and Agriculture. Availability of these data afforded an opportunity for important additions to several sections. Particularly involved were section 1, Area and Population; section 4, Education; section 8, Labor Force, Employment, and Earnings; section 24, Agriculture—General Statistics; section 25, Agriculture—Production and Related Subjects; and section 29, Construction and Housing. As a result, the presentation in these sections is not only more current but also more complete both in terms of subject coverage and area coverage.

A section which has undergone a significant change in this edition is section 33, Territories, Possessions, and Other Areas Under the Jurisdiction of the United States. This section, which previously included only data on commerce of the Territories and Possessions, has been considerably expanded by shifting to it material which was scattered in a number of sections and adding new material from the 1950 Censuses, particularly on population and housing.

Other changes in this edition involve particularly the recent study, *Share Ownership in the United States*, made by the Brookings Institution, from which five tables have been excerpted and added to the Banking and Finance section. The Business Enterprise section provides three new tables dealing with the survival experience of business firms, and two new tables on industrial research and development expenditures. Several new tables on individual and family income have been added to the Income and Expenditures section. New material in other sections includes: Tables showing first marriage and remarriage by age of bride and groom, and divorces and annulments by duration of marriage; Federal prisoners with previous commitments; estimated State distribution of selected Federal expenditures for veterans; number of civilian employees with veteran preference in the executive branch of the Federal Government;

value in constant dollars for raw materials production, imports, exports, and apparatus consumption; votes cast for Governor by States; expenditures by organizations attempting to influence national legislation; indexes of production, employment, prices, retail trade, and income for selected foreign countries; and a number of other subjects.

With respect to content other than tabular, efforts to expand and improve the general notes preceding each section were continued, notably in section 18, Communications, and section 23, Irrigation, Drainage, and Soil Conservation. On the first page of text in each section, a note has been added giving the date on which the material for the section as a whole was organized and sent to the printer. This date serves as a reference point both for those statistics which are subject to revision by the issuing agencies and also to indicate the approximate date on which the section was organized from the latest material available. There are a total of 45 maps and charts presented in this edition, as compared to 31 in the last issue. In addition, the "Bibliography of Sources" has been expanded and revised.

Historical appendix.—As a result of integrating the annual *Statistical Abstract with Historical Statistics of the United States, 1789-1945*, most of the historical series which have previously been shown in the historical appendix are now presented in other tables in the *Abstract*. In order to facilitate the location of these tables, the present version of the historical appendix relates each historical series for which comparable current data are available to the number of the *Abstract* table in which the series appears.

Present plans are to issue a separate publication which will bring to date, under a single cover, all current series in *Historical Statistics*, together with all known revisions in figures published earlier, thus consolidating and supplementing all data which have been included in the historical appendix of the 1949-1952 editions of the *Statistical Abstract*.

Supplements to the Abstract.—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, and others often require data on individual cities, counties, metropolitan areas, and other small areas as well as on States. Economists, teachers, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the *Abstract* has been issued.

The most recent supplement, the *County and City Data Book, 1952*, issued in March 1953, brings together 128 items of information for each county, standard metropolitan area, and State; and 133 items for each of 484 cities with 25,000 or more inhabitants in 1950. Most of the statistics in this volume were obtained from the results of the 1950 Censuses of Agriculture, Population, and Housing. Other subjects covered include 1950 data for births, deaths, and marriages; bank deposits and E Bond sales; city government finances and employment; city school systems; farm-operator family living index; and other items of social and economic importance. Final figures for a number of items from the 1948 Census of Business and the 1947 Census of Manufactures are also shown. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for \$4.25.

Historical Statistics of the United States, 1789-1945, a historical supplement, was published in July 1949. This volume brings together 3,000 statistical series which extend back through time. Data are shown for each year back to 1789 or to the earliest data available for the series. In the preparation of this supplement the Bureau had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council. This volume is on sale by the Superintendent of Documents, Washington 25, D. C., for \$2.75.

availability.—As implied in the title, the contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material (pages XII–XV.) The Bureau of the Census cannot accept the responsibility for accuracy or limitations of the data presented here, other than for those which it has. However, the responsibility for selection of the material for the general use of the Bureau for proper presentation rests with the Bureau, even though carried out with the cooperation of many technicians who have given unselfishly of their time and labor in order to assist the Bureau's staff in making the presentation as meaningful as possible.

The cooperation of the users must also be acknowledged. Many persons have offered suggestions for improving the presentation of the material. These have been most helpful and users are urged to continue to make their needs known.

All suggestions will be carefully considered in planning future editions.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

Refer to the agency indicated in the source note to the table which covers the subject.

SUGGESTIONS AND COMMENTS

should be sent to
The Director
Bureau of the Census
Washington 25, D. C.

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1952. A compact presentation of 128 items of statistical data for each county and standard metropolitan area in the United States, and 133 items of statistical data for each of 484 cities having 25,000 or more inhabitants in 1950. Items included based largely on results of 1950 Censuses of Agriculture, Population and Housing. Includes 51 maps, explanatory and definitive text, and source notes. 608 pages. Issued 1953. Price \$4.25 (Buckram).

Historical Statistics of the United States, 1789-1945. A supplement to the *Statistical Abstract*, prepared with the cooperation of the Social Science Research Council. A compilation of about 3,000 statistical time series, largely annual, extending back through time to the earliest year for which figures are available. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 363 pages. Issued 1949. Fourth printing. Price \$2.75 (Buckram).

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

Governmental units—Aid from Federal Government—General revenues and general expenditures—Public-service enterprises—State tax collections—State unemployment-compensation funds—Debt—Employees and payrolls—Finances of retirement systems. <i>Figs. XXX-XXXI. Government Tax Revenues; Government Employees and Payrolls.</i>	
BANKING AND FINANCE	412
Currency and gold—Bank clearings—Banks; principal assets, liabilities and other information for all banks, Federal Reserve banks, National banks, mutual savings banks—Savings—Liquid assets—Savings and loan associations—Credit unions—Government credit agencies—Farm credit—Consumer credit—Commodity and stock exchanges—Money rates—Securities markets—Share ownership—Insurance. <i>Figs. XXXII-XXXIV. Stock Prices; Bank Deposits and Currency Outside Banks; Bank Assets.</i>	
BUSINESS ENTERPRISE	473
Business population and turnover—Corporate assets and liabilities—Corporation income, profits, dividends, and taxes—Sources and uses of corporate funds—Income of unincorporated enterprise—Business expenditures for new plant and equipment—Gross private domestic investment—Business sales and inventories—Industrial and commercial failures—Patents—Research and development expenditures. <i>Fig. XXXV. New Plant and Equipment Expenditures.</i>	
COMMUNICATIONS	496
Telephone systems—Telegraph systems—Radio and television networks and broadcast stations—Newspapers, periodicals and books—Registration of copyrights—Postal service.	
POWER	513
Supply of energy—Electric energy; capacity of generating plants and production—Financial and operating statistics of electric utility companies—Rural electrification—Income account of natural gas companies—Gas utility industry—Water power. <i>Fig. XXXVI. Capacity of Electric Generating Plants.</i>	
ROADS AND MOTOR VEHICLES	526
Rural roads—State highway systems—Federal highway projects—Public roads finances—Motor-vehicle factory sales—Motor-vehicle travel—State motor-vehicle registrations and revenues—Motor fuel consumption—Motor-vehicle accident fatalities.	
TRANSPORTATION, AIR AND LAND	537
Steam railways: Mileage; equipment; employees; receiverships; capitalization, investment, income, dividends, revenue, expenses; freight and passenger service; accidents—Express companies—Pullman company—Motor carriers of property and passengers—Motorbus lines—Trolley-bus and street-car lines—Civil aeronautics—Airports. <i>Fig. XXXVII. Revenue Freight Originated.</i>	

Section

22. WATERWAYS, WATER TRAFFIC, AND SHIPPING.....

Water-borne commerce, foreign and domestic—Ocean ports—Great Lakes ports—Rivers, canals, and connecting channels—Merchant marine—Panama Canal traffic—Net tonnage of vessels entered and cleared in foreign trade.

23. IRRIGATION, DRAINAGE, AND SOIL CONSERVATION.....

Irrigation enterprises—Irrigation of agricultural lands—Federal reclamation projects—Drainage on farms—Drainage enterprises—Soil conservation.

24. AGRICULTURE—GENERAL STATISTICS.....

Balance sheet of agriculture—National farm product—Number and acreage of farms—Land utilization—Value of farm property—Value of farm products—Color and tenure of farm operators—Farm mortgage status and indebtedness—Indexes of farm prices—Farm income and expenditures—Farm labor—Commodity Credit Corporation inventories and acquisitions—Farm facilities, roads, etc.—Farmers' marketing and purchasing associations.

Figs. XXXVIII-XL. Farm Income; Prices Received and Paid by Farmers; Farm Assets.

25. AGRICULTURE—PRODUCTION AND RELATED SUBJECTS.....

Indexes of volume of farm production—Farm labor productivity—Agricultural products exported and imported—Acreage, production, and value of crops—Average prices of crops and livestock—Animal and vegetable fats and oils—Domestic animals and poultry on farms—Livestock and livestock production—Stockyard receipts and shipments—Meats, lard, and animal products—Margarine—Cold storage holdings—Wool.

26. FORESTS AND FOREST PRODUCTS.....

Commercial forest land—Stand and growth of saw timber—Annual drain—National forests—Forest fires—Forest tree distribution program—Lumber and lumber products.

27. FISHERIES.....

Quantity and value of catch—Canned and frozen fishery products—Exports and imports of fishery products—Fish propagation.

28. MINING AND MINERAL PRODUCTS.....

Mineral production—Firms in mineral industries—Indexes of physical volume—Imports and exports—Consumption—Prices—Employees—Injuries—Work stoppages.

Fig. XLI. Value of Mineral Production.

29. CONSTRUCTION AND HOUSING.....

Expenditures for private and public construction—Construction contracts—Construction and building costs—Public housing—Characteristics and occupants of dwelling units—Rents and values—Facilities and equipment—Persons per room—Nonfarm mortgaged properties.

Fig. XLII. New Construction Activity.

MANUFACTURES.....

Manufacturing establishments—Wage earners and production—
Indexes of industrial production—Concentration of large companies—
Fuels and electric energy consumed—Expenditures for plant and
equipment—Inventories—Production and related information of
selected products and groups of products—Sales and exports of home
appliances—Motion-picture industry.

Fig. XLIII. Industrial Production Indexes.

DISTRIBUTION AND SERVICES (INCLUDING ADVERTISING)..... 840

Wholesale trade—Retail trade—Chain stores and mail-order houses—
Consumers' cooperatives—Department stores—Service establish-
ments—Hotels—Places of amusement—Advertising.

Fig. XLIV. Department Store Sales and Stocks.

**FOREIGN COMMERCE (INCLUDING INTERNATIONAL AC-
COUNTS AND AID)**..... 880

International accounts—Foreign investments—Foreign assistance—
Foreign trade—Merchandise, gold and silver—Trade balances—
Trade by economic classes and commodity groups—Trade by country
of destination and origin—Duties collected.

Fig. XLV. Foreign Trade by Economic Classes.

**TERRITORIES, POSSESSIONS, AND OTHER AREAS UNDER
THE JURISDICTION OF THE UNITED STATES**..... 927

Area—Number and characteristics of inhabitants—Births and
deaths—Housing—Agriculture—Manufactures—Mineral produc-
tion—Imports and exports—Shipments to the United States.

COMPARATIVE INTERNATIONAL STATISTICS..... 944

Population, area, and vital statistics—Economic indexes—Manufac-
turing—Foreign trade and exchange rates—Farm products—Food
supply—Mineral products—Electric energy—Geographical product
by industrial origin—Transportation—Communications—Education
and health—Member contributions to United Nations.

FIG. I.—MAP OF THE UNITED STATES, SHOWING CENSUS DIVISIONS

Source: Department of Commerce, Bureau of the Census.

1. Area and Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made once every ten years by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of members of the House of Representatives among the several States. From 1800 to 1900, the census was conducted by a temporary organization built up by the Superintendent of the Census appointed for each decennial census. In 1902, the Bureau of the Census was established as a permanent agency of the Government, known as the Census Office; it was charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, figures are supplied by a number of intercensal surveys and estimates in addition to the comprehensive census enumeration.

The data shown here were selected chiefly from the Sixteenth and Seventeenth Censuses (1940 and 1950), and from special Census releases and reports, with the object of giving as complete a description of the population of the United States as space permits. Whenever practicable, a historical series is given in order to show changes that have occurred over periods of time. Most of the data presented apply to continental United States, but some figures for Territories and possessions are included.

Related materials are presented in other sections of this volume. Thus, statistics of marriage and divorce are presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family income are given in section 11, Income and Expenditures; and Census data on employment and occupations are given in section 8, Labor Force, Employment, and Earnings. Data on the population in institutions as enumerated in 1950 are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 5, Law Enforcement and Federal Courts. Tables on nativity and citizenship are included in this section, but related data are included in section 3, Immigration, Emigration, and Naturalization.

Decennial censuses.—There are many difficulties involved in the process of obtaining a complete and unduplicated count of the population. Although great efforts are made to obtain such a count, the results fall short of this objective to some degree. These difficulties and their resultant shortcomings are present in all censuses. The magnitude of error, however, may vary from census to census.

In accordance with Census practice dating back to 1790, each person enumerated in the 1950 Census was counted as an inhabitant of his usual place of residence or usual place of abode, that is, the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile, although, in the vast majority of cases, the use of these different bases of classification would produce identical results.

Certain of the data which are presented are indicated as being based on information obtained from a representative sample of the population. For example, tables 28, 29, 31, 33, 37, 38, and 50 include 1950 data based on a representative 20-percent sample of the 1950 Census of Population. A separate line was provided on the population schedules for each person enumerated, with every fifth line designated as a sample line. The sample data in the above tables are based on the persons enumerated on these special lines. Estimates of the number of persons with specified characteristics based on sample data have been obtained by multiplying the number of persons in the sample having these characteristics by five.

Note.—This section presents data for the most recent year or period available on February 18, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

A number of tables also include 1940 data obtained on a sample basis. Sample B is a sample of all individuals from the 1940 Population Schedule; Sample C and Sample W are samples of individual women 15 years old and over from the 1940 and 1910 Population Schedules, respectively. For Sample B, the sample size is 5 percent. Sample C is 5 percent in most areas, but includes a 2½ percent sample in the most populous areas. Sample W is an 8-percent sample for the North and the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between them and the complete count, but the sample data may be used with confidence when large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources.

Current Population Survey.—Several tables present statistics based on the Current Population Survey, conducted monthly by the Bureau of the Census. This survey covers a representative sample of about 25,000 households taken in selected areas throughout the United States. A statement indicating the sampling reliability of estimates based on this sample is given in the Sampling Note, p. 181.

Population estimates.—Population estimates for dates after April 1940, which are not the result of sample surveys, are based on data from the 1940 Census and, in some cases, the 1950 Census; statistics of births and deaths provided by the National Office of Vital Statistics, United States Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the armed forces provided by the Department of Defense. Intercensal estimates of State population are based on the same types of data and also make use of school statistics, war ration book registrations, and State censuses.

Urban and rural areas.—In the course of its history, the Bureau of the Census has employed several definitions of urban area.

According to the new urban definition adopted for the 1950 Census, the urban-rural population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, and villages, (b) incorporated towns of 2,500 inhabitants or more except in New England, New York, and Wisconsin, where "towns" are simply minor civil divisions of counties, (c) the densely settled urban fringe, including both incorporated and unincorporated areas, around cities of 50,000 or more, and (d) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural.

According to the 1940 definition, the urban area was made up for the most part of cities and other incorporated places having 2,500 inhabitants or more. In addition, it included townships and other political subdivisions (not incorporated as municipalities nor containing any areas so incorporated) with a population of 10,000 or more and a population density of 1,000 or more per square mile; and in Massachusetts, Rhode Island, and New Hampshire, those towns (townships) which contain a village of 2,500 or more, comprising either by itself or when combined with other villages within the same town, more than 50 percent of the total population of the town. The remaining area of the country was classified as rural. The definition of urban area used in the 1940 Census was adopted substantially as stated above for the 1910 Census.

In both the new definition of 1950 and the old definition of 1940, incorporated places of 2,500 or more inhabitants constitute the major component of urban territory. The new definition differs from the old definition in substituting specially delineated urban fringes and unincorporated places of 2,500 inhabitants or more for those political subdivisions which were specified as urban under the special rules given above.

In this edition, figures by urban and rural residence for all dates prior to the 1950 Census are in accordance with the old definition. Figures for 1950 and subsequent years are in accordance with the new definition unless otherwise stated.

Farm and nonfarm residence.—The rural population is subdivided into the rural-farm population, which comprises all rural residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. The method of determining farm and nonfarm residents used in the 1950 Census differs somewhat from that used in earlier surveys and censuses. Persons on "farms" who were paying cash rent for their house and yard only were classified as nonfarm; furthermore, persons in institutions, summer camps, motels, and tourist camps were classified as nonfarm.

Household.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. The number of households, thus defined, is the same as the number of "private households" or "families" as used in 1940 census reports. A person living alone or a group of unrelated persons sharing the same dwelling unit as partners is counted as a household.

The term "household" excludes the small number (about 80,000 in 1940) of institutions, hotels, large lodging houses, and other quasi households which are included as households in the Census reports (and in figures shown in this edition) for 1920, 1910, 1890, and earlier years. The figures for 1900 and for 1930 and subsequent years, shown in this edition, are in conformance with the present usage of the term "household" as defined above.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers or resident employees and their relatives, living in a household or quasi household (other than the negligible number of such groups among inmates of institutions) and related to each other. In a household, a secondary family is not related to the household head, but in a quasi household, a secondary family may include the head of the quasi household.

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

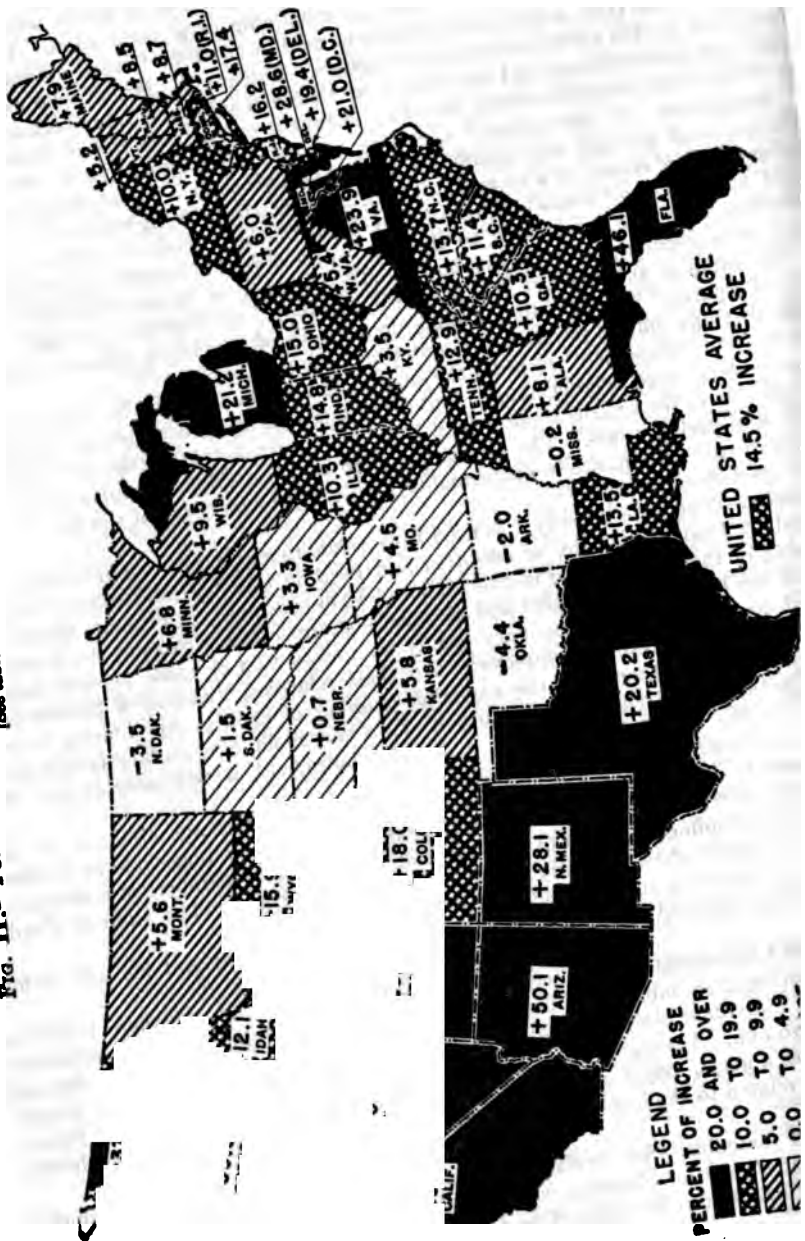

Married couple.—A married couple is defined as a husband and his wife living together.

Unrelated individuals.—The term "unrelated individuals" as used here refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or a quasi household such as a guest, lodger or a resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or quasi household.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series B 24-25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

NO. 1.—TERRITORIAL EXPANSION OF CONTINENTAL UNITED STATES AND ACQUISITIONS OF PRINCIPAL TERRITORIES, POSSESSIONS, ETC.

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Adjustments have been made in the areas as remeasured in 1940. See also *Historical Statistics*, series B 24-25]

¹ Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

² Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

³ Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama. ⁴ Leased (1914) from Republic of Nicaragua for 99 years. ⁵ Under trusteeship. See table 3, footnote 17.

⁶ Includes following islands with gross areas as indicated: Midway (2), Wake (3), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than 0.5), Kingman Reef, Quita Sueno Bank, Roncador Cay, and Serrano Bank (each less than 0.5) and other islands specified in table 3, footnote 10, for which area figures are not available.

No. 5.—POPULATION PER SQUARE MILE, BY STATES: 1800 TO 1950

[For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890.]

8.—ESTIMATES OF THE FARM POPULATION: APRIL 1910 TO 1951

NOTE. Figures represent revised estimates to accord with new definition of farm population adopted in 1960 Census of Population and for current surveys of the Bureau of the Census and the Bureau of Agricultural Economics. New definition excludes from farm population certain groups formerly included. Most important of these groups is population living in houses located on farms, occupants of which pay cash rent on house and yard only without any farm land. Majority of such families have no connection with agriculture and receive no income from agriculture. See also *Historical Statistics*, series B 231]

YEAR	Farm population	YEAR	Farm population	YEAR	Farm population

No. 9.—PROVISIONAL ESTIMATES OF POPULATION BY STATES: JULY 1, 1943 TO 1

[In thousands. Includes members of armed services stationed in continental United States, but excludes 1 overseas. Based on data from 1940 and 1950 Federal censuses, State censuses, school statistics, vital state registrations for war ration books, immigration statistics, and data on armed forces. 1943-49 data in part of revision; see table 7 for revised U. S. totals. For enumerated population, 1790 to 1950, see table 10]

¹ Includes persons (5,318 in 1830 and 6,100 in 1840) on public ships in service of the United States, not credited to any region, division, or State.

² Population of Territory Northwest of River Ohio.

³ 1800 includes population (3,124) of those portions of Indiana Territory which were taken to form Michigan and Illinois Territories in 1805 and 1809, respectively, and that portion which was separated in 1816; 1810 includes population of area separated in 1816.

⁴ Population of Illinois Territory.

⁵ Population of Michigan Territory as then constituted; boundaries changed in 1816, 1818, 1834, and 1836.

⁶ Includes population of that part of Minnesota northeast of Mississippi River.

⁷ Includes population of area constituting that part of Minnesota lying west of Mississippi River and a line drawn from its source northwards to Canadian boundary.

¹ Population of those parts of Mississippi Territory now in present State.

² Population of those parts of present State included in Mississippi Territory as then constituted.

³ Censuses taken under direction of Spanish Government.

⁴ Revised; unrevised figure is 38,558,371. Census of Southern States considered incomplete but there has been no revision of State figures, hence State and region figures do not add to total shown here.

⁵ Includes population (325,464) of Indian Territory and Indian reservations, specially enumerated.

⁶ Population of Dakota Territory.

⁷ Includes population of area taken to form part of Arizona Territory in 1863.

⁸ Population of Utah Territory exclusive of that part of present State of Colorado taken to form Colorado Territory in 1861.

⁹ Population of Nevada Territory as organized in 1861.

¹ Comprises both net immigration from abroad and net interdivisional or interstate migration.² Estimated net loss to armed forces less than 500.Source: Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-26, No. 47.

No. 13.—POPULATION OF STANDARD METROPOLITAN AREAS: 1940 AND 1950

[Minus sign (—) denotes decrease. A standard metropolitan area is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more. In addition the county, or counties, containing such a city, or cities, contiguous counties are included in a standard metropolitan area if according to certain criteria they are essentially metropolitan in character and sufficiently graded with the central city. In New England, standard metropolitan areas have been defined on a town basis on a county basis. This list of areas is based on "Standard Metropolitan Area Definitions" issued by Executive Office of the President, Bureau of the Budget, on October 17, 1950, and "Addendum to list issued October 8, 1952. For detailed explanation of standard metropolitan area concept and data for geographic components of each area, see source and *County and City Data Book, 1955*, a supplement to the *Statistical Abstract*]

**No. 17.—NUMBER OF PLACES IN URBAN AND RURAL TERRITORY, BY SIZE OF PLACE:
1860 TO 1950**

In 1940 and 1950, the following were counted as separate incorporated places, whereas in 1930 and earlier years each pair was counted as a single place: Bluefield, Va., and Bluefield, W. Va.; Bristol, Tenn., and Bristol, Va.; Delmar, Del., and Delmar, Md.; Harrison, Ohio, and West Harrison, Ind.; Junction City, Ark., and Junction City, La.; Texarkana, Ark., and Texarkana, Texas; Texhoma, Okla., and Texhoma, Texas; and Union City, Ind., and Union City, Ohio. For description of old and new definitions, see p. 2. See also *Historical Statistics*, series B 145-150]

colored population only.

Population of Indian Territory and Indian reservations, specially enumerated in 1890, with a total of 325,451 not distributed by State of birth. These areas were not enumerated prior to 1890. For 1950 census returns; see original sources for sampling variability.

Department of Commerce, Bureau of the Census; 1950 Census of Population, advance tabulations of *of Birth*, and records.

WHITE, 15 TO 49 YEARS OLD, AND NUMBER OF OWN CHILDREN UNDER 5 YEARS OLD: APRIL 1940 TO 1952

Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-20, No. 46.

No. 40.—GROSS AND NET REPRODUCTION RATES, BY COLOR, URBAN AND RURAL RESIDENCE, AND REGIONS: 1905 TO 1910, 1930 TO 1935, 1935 TO 1940, 1942 TO 1947, AND 1944 TO 1949

[Statistics for 1905 to 1910 based on Sample W, and those for 1930 to 1935 and 1935 to 1940 based on Sample C (see p. 2); statistics for 1942 to 1947 and for 1944 to 1949 based on Current Population Survey made in April 1947 and April 1949, see Sampling Note, p. 181. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improvement in mortality alone would prevent a potential decline in population]

MARITAL STATUS OF PERSONS 14 YEARS OLD AND OVER, BY SEX—TOTAL POPULATION, 1890 TO 1940, AND CIVILIAN POPULATION, 1947 TO 1952

Thousands. 1947-1952 based on Current Population Survey; see Sampling Note, p. 181. Civilian (April 1947 to April 1952) includes members of the armed forces living off post or with their families includes all other members of the armed forces. Armed forces included are as follows: 1947, 254,000; 1949, 393,000; 1950, 547,000; 1951, 610,000; 1952, 674,000]

Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-20, No. 44.

HOUSEHOLDS, BY COLOR OF HEAD, WITH POPULATION PER HOUSEHOLD: 1890 TO 1952

to 1940 based on complete census. Figures for 1941 to 1945 estimated on basis of number of marriages and allowances for wartime effects on household formation. Figures for 1946 to 1952 based on Current Population Survey, see Sampling Note, p. 181. Statistics for 1900, 1930, and subsequent years represent households only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other establishments. For definition of households, see p. 3. See also *Historical Statistics*, series B 171-181]

by compound interest formula.

¹ by dividing total population by number of households (members of armed forces excluded 1941 to 1945) and by dividing by strictly average size of household because about 2.5 percent of total population are members of households.

² of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,018 in 1910; 2,430,13,756 in 1930; and 3,141,883 in 1940.

STATISTICS OF RELIGION—CHURCH MEMBERSHIP AND NUMBER OF CLERGY

most information available from religious bodies; excludes a few groups giving no data, such as Church Scientist, and Jehovah's Witnesses. Totals include, substantially, those religious bodies reporting to Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count up in same way; some groups give only approximate figures. Roman Catholics count all baptized including infants; Jews regard as members all Jews in communities having congregations; Eastern Churches include all persons in their nationality or cultural groups; most Protestant bodies count only those who have attained full membership, and previous estimates have indicated that all but a small minority over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all persons, and not only those confirmed]

2. Vital Statistics, Health, and Nutrition

Vital statistics.—Vital statistics, including statistics of births, deaths, marriages, divorces, and communicable diseases, are compiled and published by the National Office of Vital Statistics, Public Health Service. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births and deaths.—The national collection of mortality statistics on an annual basis was begun in 1900. For that year, the death-registration States consisted of 10 States and the District of Columbia. In 1915, the national collection of birth statistics was begun with 10 States and the District of Columbia. Beginning with 1933, the birth and death registration areas have comprised the entire United States.

Births and deaths are classified by place of occurrence and by place of residence¹ of the mother or of the decedent. In most of the following tables, the data are shown by place of residence.

Birth statistics include only live births. Most of the natality data refer to *registered* births. However, a number of tables also present birth statistics corrected for under-registration and corrected for incompleteness of the birth-registration area for years prior to 1933.

Death statistics include only deaths occurring in the continental United States and exclude deaths among armed forces overseas. Fetal deaths (stillbirths) are excluded from death statistics.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867–1906, 1916, 1922–32, 1937–40 and 1944–51. Estimates have been made for the intervening years as well as for years in which collections were not complete. At the present time, records of marriage are filed centrally in three-fourths of the States, and records of divorce in more than one-half of the States. Marriage and divorce data in the following tables are shown by place of occurrence.

Vital statistics rates.—Vital statistics rates are based upon population figures provided by the Bureau of the Census. The special situation created by the changes in size and disposition of the armed forces necessitated the use of different types of population bases during the war and postwar period.² Briefly, birth and divorce rates for 1941–46 for the United States are based on the total population including members of the armed forces overseas; those for States on the civilian population in the States. Birth and divorce rates for 1947–49, 1951 and death and marriage rates for 1941–49, 1951 for the United States and States are based on total population present in the area, excluding armed forces overseas. For 1940 and 1950, rates are based on the enumerated population as of April 1; for other years, rates are based on estimated midyear populations.

Cause-of-death classification.—Causes of death are classified according to the *International List of Causes of Death*. The sixth and latest decennial revision was put into effect beginning with data for 1949.³

Morbidity.—Statistics on morbidity are compiled and published by the Public Health Service. Each State health officer reports cases of selected diseases weekly and annually. The number of diseases reported to the State health officers depends on

Note.—This section presents data for the most recent year or period available on February 18, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

¹ For a discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States, 1949, Part II, pp. V–IX*.

² For a discussion of the interpretation of crude rates during wartime, see *Summary of Natality and Mortality Statistics, United States, 1945, Vital Statistics—Special Reports, Vol. 21, No. 1, 1945*; and *Marriage and Divorce in the United States, 1887 to 1946, Vital Statistics—Special Reports, Vol. 23, No. 9, 1946*.

³ For details on comparability of causes of death due to revision, see *The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends, Vital Statistics—Special Reports, Vol. 36, No. 10, 1951*.

laws or regulations within the various States. However, most of the common communicable diseases are reportable in all States. Tables 93 and 94 show selected data on diseases reported to the Public Health Service.

In addition, data on illnesses are obtained by special surveys. The most comprehensive survey in this field is the National Health Survey made in 1935-36. Public Health Bibliography Series No. 5 gives extensive annotated citations to publications based on the National Health Survey. Morbidity studies of specific conditions, such as rheumatism and cancer, are in process. These data are supplemented by more intensive studies in specific localities such as Hagerstown and Baltimore, Md.

Medical care.—Annual statistics of medical care on a Nation-wide basis are obtained from the annual census of hospitals and institutions conducted by the American Medical Association. Such censuses include only hospitals, sanatoriums, and related institutions registered by that organization. Therefore, a relatively large number of institutions are not included in the survey. However, practically all of the large institutions in the country are canvassed with the result that most of the hospital bed facilities are usually included.

An index to one aspect of medical care is also provided by the numbers of births and deaths occurring in hospitals and institutions. These data may be found in the Public Health Service publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. Beginning with the 1947 report, the annual reports are issued by the National Institute of Mental Health, Public Health Service; from 1926-46, the data were collected annually by the Bureau of the Census.

Nutrition.—Statistics on the apparent consumption of food per capita by civilians are estimated by the Bureau of Agricultural Economics of the Department of Agriculture. On the basis of these estimates, statistics on the nutritive value of the per capita food supply are computed by the Bureau of Human Nutrition and Home Economics. These statistics are published quarterly by the Bureau of Agricultural Economics in the *National Food Situation*. Methodologies and detailed information back to 1909 are available in Misc. Pub. No. 691, *Consumption of Food in the United States 1909-48*, and its supplements.

Statistics on Federal food distribution programs, and data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

Under the provisions of Federal laws, food commodities are distributed for school lunches and to institutions and welfare cases. Statistics on direct distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320 approved in 1935, Section 6 of the National School Lunch Act of 1946, Public Law 471, Eighty-first Congress, and commodities distributed under Section 416 of the Agricultural Act of 1949 on which the recipient paid the freight from point of storage, are presented in tables 98-100. Distribution to ultimate recipients is accomplished through cooperating distributing agencies in States. Cost represents cost to the Federal government of the commodity as delivered to the State distributing agency and includes cost of purchase, handling, warehousing, and transportation charges, but excludes cost of administrative expenses, except that \$8.9 million expended for Section 416 commodities excludes transportation charges which were paid by recipients. Statistics on the indemnity plan, which is a subsidy program to expand markets for agricultural products, maintain outlets for government-owned commodities, and support school-lunch programs, are shown in tables 98 and 100. Sponsors of school-lunch programs are reimbursed by the government for local purchases of food on a basis of quality and quantity of meals served. This program was started in 1943.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series C 24, C 45, C 77-78) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 54.—BIRTHS, DEATHS, MARRIAGES AND DIVORCES AND RATES PER 1,000 POPULATION: 1900 TO 1951

(Births and deaths are for registration States and represent registered births and deaths only; for births adjusted for underregistration, see table 56. For coverage of these areas, see table 55. Marriage and divorce data are for the United States. For additional rates, see *Historical Statistics*, series C 24, C 45, C 77-78]

For 1940, 1947, and 1950, rates based on total population in each specified area (excluding armed forces overseas). For 1943 and 1945, rates for the United States based on population including armed forces overseas; rates for States based on civilian population. United States rates on civilian population base were: 23.0 (1943) and 21.4 (1945).

1950	2,960	8.3	103,826	29.2	72,502	20.4

¹ Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning with 1940, deaths are classified according to sixth revision of *International Lists of Diseases and Causes of Death*. For deaths in United States as a whole, it is estimated that 9 percent fewer deaths were assigned to maternal causes under sixth revision than under fifth revision of *International List* (1939-48).

² Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated.

Source: Department of Health, Education, and Welfare, Public Health Service, National Office of Vital Statistics; annual report, *Vital Statistics of the United States*.

MARRIAGES

81

NO. 80.—MARRIAGE LICENSES ISSUED—UNITED STATES AND MAJOR CITIES (OR COUNTIES), BY MONTH: 1949 TO 1952

[Figures for United States represent marriage licenses and marriages reported. Figures for major-city areas represent licenses issued in 34 cities with populations of 100,000 or more according to the 1950 census, and in 69 counties containing the remaining 72 cities in that population-size group. These areas contain nearly two-fifths of the total population of the United States]

NO. 93.—REPORTABLE DISEASES—NUMBER OF CASES REPORTED FOR SELECTED CAUSES, BY MONTHS: 1951

[Includes cases reported in military establishments in the United States. Figures on number of reported cases of communicable diseases in this and following table should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete, with degree of completeness varying from State to State. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned. Names of diseases are in conformity with the Sixth Revision of the *International List, 1949*]

DISEASE	January	February	March	April	May	June	July	August	September	October	November	December

¹ Preliminary.

² Data not available.

³ Excludes canned food products containing small quantities of fish such as clam chowder, etc.

⁴ Series in process of revision as result of 1950 Census of Agriculture for all years for total milk, fluid milk and cream, fresh vegetables; 1946 through 1950 for total fresh fruit, fresh citrus fruit; and 1946 through 1949 for potatoes, sweet potatoes, dry beans.

⁵ Average for 1937-39.

⁶ In terms of malt equivalent.

⁷ Comprises white, whole wheat, and semolina flour.

⁸ Green bean basis.

No. 97.—NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1935 TO 1952

[Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from urban gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics*, series C 122-127]

3. Immigration, Emigration, and Naturalization

Aliens or citizens arriving or departing by vessel or airplane at ports other than land border ports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 101) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 102). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 108), returning resident aliens, students, and

Note.—This section presents data for the most recent year or period available on February 18, 1953, when the material was organized and sent to the printer.

others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 102). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Alien registration.—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series B 304") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

[Data are for fiscal years ending June 30, except as noted; for periods they are totals, not annual averages. From 1819 to 1867 figures represent alien passengers arriving; for 1868 to 1891 inclusive and 1895 to 1897 inclusive, immigrant alien arrivals; for 1892 to 1894 and from 1898 to the present time, immigrant aliens admitted. See also *Historical Statistics*, series B 304]

No. 104.—ANNUAL QUOTAS ALLOTTED AND QUOTA IMMIGRANTS ADMITTED, BY QUOTA COUNTRY OR REGION: YEARS ENDING JUNE 30, 1936 TO 1952

[Number of aliens admitted annually of any nationality subject to the quota law was limited by Immigration Act of 1921 to 3 percent of number of foreign-born of such nationality resident in continental United States as determined by 1910 census; and by population plan of act of 1924, to 2 percent according to 1890 census. National origins clause of 1924 act, effective July 1, 1929, provided that quota of any nationality be computed by applying to 150,000 the ratio between calculated number of inhabitants in continental United States in 1920 owing their origin to nationality concerned and the total inhabitants in the United States of all nationalities subject to quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, *Statistical Abstract*, 1952.) Under 1924 act, minimum quota is 100; for nonquota classes, see general note, p. 95]

¹ Persons born in colonies, dependencies, or protectorates, or portions thereof within barred zone, of European countries, who are admissible under immigration laws of United States as quota immigrants, are charged to quota of country to which such colony or dependency belongs or by which it is administered as a protectorate. Aliens who obtain visas during later part of fiscal year may be admitted in following year since visas are valid for period of 4 months. Nationality for quota purposes does not always coincide with actual nationality (Sec. 12, Immigration Act of 1924).

² Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by act of December 17, 1943 increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Quota was increased to 154,306 on July 27, 1949, by establishment of separate quotas of 100 each for Israel, Syria, and Lebanon, and abolishment of combined quota of 123 established for Syria and Lebanon. Quota was increased to 154,277 on Oct. 31, 1950, when quota for Italy was reduced to 5,677, quota for Yugoslavia was increased to 938, and a separate quota of 100 was established for Trieste.

³ Number of quota immigrants exceeds quota because 50 percent of quota for future years may be mortgaged where necessary under Displaced Persons Act of 1948.

⁴ For 1938 to 1945, Austrian quota included with German.

⁵ Philippines included in Asia in 1952; previously included in Pacific.

All other countries ⁵	254,236	* 33,523	1,147	228		142	7	20	8

¹ Includes Serbia and Montenegro prior to 1920.

² Austria included with Germany 1938-45.

³ From 1899 to 1919 Poland is included with Austria-Hungary, Germany, and Russia.

⁴ Philippines included in "Other Asia" in 1932 (1,179); previously included in "All other countries."

⁵ Includes 32,897 persons returning to their homes in the United States. After 1906 such aliens have been included in immigration statistics as nonimmigrants; prior to that year, aliens were recorded by countries whence they came (see headnote).

¹ Legislation authorizing admission was approved June 25, 1948. Admissions prior thereto were under President's Directive of Dec. 22, 1945.

² Act of Dec. 28, 1945, which facilitated entry of alien wives, husbands, and children of citizen members of armed forces, expired on Dec. 28, 1948. Public Law 51 of Apr. 21, 1949, authorized admission of certain alien fiancées and fiancés and adjustment of their status to that of permanent residence.

4. Education

Data on school attendance and on educational attainment were obtained for individuals in the United States as part of the 1940 and 1950 Censuses of Population. Annually, beginning in 1945, the Bureau of the Census has reported on school enrollment (and in 1947 and 1952 on educational attainment and illiteracy) of the population, based on sample data obtained in the Current Population Survey. The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools. Public library statistics are also collected and published by this office. Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational statistics for individuals.—The school attendance statistics are based on the replies to the enumerator's inquiry as to whether the person had attended, or had been enrolled in, any regular school or college within a given period. Regular school enrollment does not include enrollment in kindergarten or nursery school or, generally, enrollment in vocational, trade, business, or correspondence schools.

The 1940 and 1950 Censuses included questions on the formal educational attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses.

The median year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the first year of college by 13, although there are some areas with only 7 years of elementary school.

Statistics for schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics. Since about 1930, a similar movement has been in progress with institutions of higher education, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the *Abstract* from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private commercial, trade and vocational schools, or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. Information on vocational education is compiled by the U. S. Office of Education.

Data in this section relate to continental United States except as noted.

Note.—This section presents data for the most recent year or period available on February 18, 1963, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

SCHOOL ATTENDANCE

109

No. 118.—PERSONS ATTENDING SCHOOL BY SINGLE YEARS OF AGE FROM 5 TO 20,
BY SEX: 1920 TO 1950

[Statistics for 1940 and 1950 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 2 prior censuses, school attendance question not restricted as to type of school or college. In 1930, question referred to period between Feb. 1 and Apr. 1, 1930; in 1940, to period between Mar. 1, and Apr. 1, 1940; in 1950, to period between Sept. 1, 1949, and Apr. 1, 1950; and in 1920, to period between preceding Sept. 1 and Jan. 1. Estimates for 1950 based on sample of 1950 census returns]

NO. 154.—VOCATIONAL SCHOOLS AND VOCATIONAL TEACHER-TRAINING COURSES, FEDERALLY AIDED—NUMBER OF TEACHERS AND STUDENTS, BY CLASS OF SCHOOL OR COURSE AND BY SEX: YEARS ENDING JUNE 30, 1920 TO 1951

[Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, Puerto Rico, and Virgin Islands, and providing for further development of vocational education. These acts, administered by Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico beginning 1940, for Virgin Islands beginning 1951]

5. Law Enforcement and Federal Courts

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers, and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semi-annual bulletin, *Uniform Crime Reports*. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover about three quarters of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State Judicial

Note.—This section presents data for the most recent year or period available on February 15, 1953, when the material was organized and sent to the printer.

Council or the Attorney General or some other State agency. The only national compilation of such information was that made by the Bureau of the Census which annually published statistical data on criminal cases disposed of in the general trial courts of from sixteen to thirty States including the District of Columbia. The latest data collected by the Census Bureau were those for 1945. No national collection is now made.

Comprehensive information is collected on the business of the Federal courts by the Administrative Office of the United States Courts, and is published annually in the *Report of the Director*. The bulk of civil litigation in the country is commenced and determined in the various State courts, and only when the United States Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the United States District Courts, and one or more of these courts is established in every State, Territory, or possession. Appeals from the district courts are taken to intermediate appellate courts of which there are eleven. They are known as United States Courts of Appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. A national compilation of data on prisoners in Federal and State prisons and reformatories was made annually by the Bureau of the Census until after the 1947 data were compiled when this work was transferred to the Bureau of Prisons. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority, are now published periodically in *National Prisoner Statistics* bulletins of the Bureau of Prisons. The Federal Bureau of Prisons, in its annual report, *Federal Prisons*, also provides as complete statistical information on Federal prisoners as has been issued in this country. In addition, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the Children's Bureau, Social Security Administration, Department of Health, Education, and Welfare.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 and 1950 decennial censuses but there is at present no regular compilation covering this field.

NO. 161.—ARRESTS, BY AGE GROUPS: 1951

[Data from arrest records, evidenced by fingerprint cards received at F. B. I. during year, are limited to instances of arrests for violations of State laws and municipal ordinances. Excludes fingerprint cards representing arrests for violations of Federal laws or commitments to any type of penal institution. Data do not represent all persons arrested, as fingerprint cards are not forwarded to Washington for every individual taken into custody. Arrest records in lower age groups probably incomplete because of practice of some jurisdictions not to fingerprint youthful offenders.]

6. Climate

Climatological data are gathered by the United States Weather Bureau at about 10,000 stations. Of this number nearly 3,000 stations have autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871, although some earlier and less detailed records began in the 18th century. Data shown in these tables include long-time averages and extremes of the several elements for the vicinities indicated. Where the station has moved, but not out of the general vicinity, the data represent combined values for both the previous and the new locations.

The following tables contain data from a list of cities selected to give a general representation of the climate over the United States. The averages represent the arithmetic means of the period of record at the station. The number of degree days as used in table 189 is the average monthly sum of the differences between 65° and the daily mean temperatures below 65°, i. e. (65°-T°). Experience has shown that, in order to heat buildings to a temperature of approximately 70°, the amount of fuel or heat used per day is proportional to the number of degrees the average outside temperature falls below 65°. The degree-day value is based on this assumption.

Note.—This section presents data for the most recent year or period available on February 18, 1963, when the material was organized and sent to the printer.

7. Public Lands and National Park System

Acquisition of original public domain.—Recognition of its sovereignty over its present continental land area was acquired by the United States Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of sovereignty over the areas involved, title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States and, with the exception of lands in the District of Columbia, is known as the *original public domain*. Any of such lands which the Government has not disposed of under the public-land laws, are generally referred to as *public-domain lands* or *public lands*.

In addition to the public domain, the United States Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for various public purposes. Such lands are often referred to as *acquired lands*, to distinguish them from public-domain lands. Complete statistics are not available as to the extent of such acquisitions.

Public-domain lands.—*Public-domain lands* or *public lands*, as used here, refers to those Federally owned lands to which the general body of public land laws apply. (See title 43, Code of Federal Regulations.) In general, it includes that portion of the *original public domain* not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be *public lands*. As a general rule, it excludes *acquired lands*, as defined above. The term *Indian lands*, as used in tables 193-195, refers to that portion of the public domain lands that was ceded to the United States by Indian tribes on condition that part or all of the proceeds from their sale or other disposition would be covered into the Treasury in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public-land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, *original entries* and *selections* are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued.

Applications become *final entries* (perfected entries) upon issuance of a *final certificate* which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. These requirements may include, in particular cases, settlement upon and improvement of the lands entered, or payment of statutory fees or purchase money. A *final certificate* passes equitable title to the land to the applicant. *Patents* are instruments which pass legal title to the lands to the applicant. *Certifications* are issued in lieu of patents in connection with certain State selections.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series F 1-7") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on February 18, 1953, when the material was organized and sent to the printer.

LANDS IN FEDERAL OWNERSHIP

¹ Estimated from imperfect data available for indicated years.² Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.³ Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.⁴ Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.Source: Department of Interior. Estimated area, Bureau of Land Management; all other data, Office of the Secretary, *Areas of Acquisitions to the Territory of the U. S., 1922*.

No. 192.—DISPOSAL OF PUBLIC LANDS: 1861 TO 1952

[For years ending June 30. Data include Alaska except where noted. Period figures are totals, not averages. See also *Historical Statistics*, series F 8-16]

¹ Includes receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1861, receipts were \$177,230,000.² As of June 30, 1952, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1802-60, total land granted to States was 96,977,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres which is due to breakage and "less than" items.³ Includes homesteads. ⁴ Includes some classes of final entries and patents prior to 1911.⁵ Excludes commuted homesteads. ⁶ 1868-1870 only.⁷ 1920 only.

No. 200.—VACANT PUBLIC LANDS—ACREAGE, BY STATES: JUNE 30, 1900 TO 1952

[Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i. e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. Figures exclude vacant public lands in Alaska estimated at 270,000,000 acres on June 30, 1952. For U. S. totals, see *Historical Statistics*, series F 8.]

8. Labor Force, Employment, and Earnings

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Current Population Survey of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, unpaid family workers, domestic servants, and others who may not be found on the payrolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture, and the Bureau of Labor Statistics of the Department of Labor. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together data from the reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given payroll period, but permits a better analysis of such data as wages, hours, labor turnover, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. The sampling methods usually used in the collection of statistics from establishments yield estimates of employment that may be subject to some error as well as to a small downward bias arising from inadequate representation of new firms entering business. Accurate estimates are maintained, however, by periodic adjustment to "benchmark" data from tabulations of employer reports obtained in connection with government social insurance programs and other sources, and by correcting current figures for selected industries for bias on the basis of past experience.

Labor force.—The labor force as now commonly defined in surveys using the population approach includes persons 14 years old and over who were employed, unemployed, or in the armed forces during a specified week. Employed persons are those who did any work for pay or profit during the week, or who worked without pay for 15 hours or more in a family enterprise (farm or business); also included are persons who did not work or look for work but who had a job or business from which they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work. The "experienced civilian labor force" consists of all employed workers and unemployed workers with previous work experience. Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation.

The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal character-

Note.—This section presents data for the most recent year or period available on March 17, 1933, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

istics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reported in each occupation and in each industry, and other items. In the 1950 Census, the labor force data relate to the calendar week preceding the enumeration visit (i. e., during the first half of April, for the majority of the population).

The Census Bureau's Current Population Survey, a monthly enumeration of approximately 25,000 households throughout the Nation, provides current data published in *Current Population Reports—Monthly Report on the Labor Force*. Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, during the calendar week containing the 8th of the month, the number employed in nonagricultural industries, the number employed in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupation group of those employed and duration of unemployment of those unemployed.

Agricultural employment.—The establishment-type series are available for both agricultural and nonagricultural employment. Agricultural employment estimates, obtained by means of monthly mail returns from crop reporters, have been issued since 1909 by the Department of Agriculture.

Nonagricultural employment.—The monthly estimates of employment in nonagricultural establishments prepared by the Bureau of Labor Statistics are based on voluntary reports from about 42,000 establishments in manufacturing industries and from about 108,000 establishments in selected nonmanufacturing industries, supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under government social insurance programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, and unpaid family workers, most of whom cannot be covered easily by the establishment approach. Persons in the Armed Forces are also excluded.

Estimates are available for total employment for 8 major industry divisions, and for selected nonmanufacturing industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 131 manufacturing subgroups, and for mining industries. Average weekly hours and average weekly and hourly earnings are available for production and related workers for over 300 series in manufacturing; in mining, laundries, and cleaning and dyeing industries; and for non-supervisory employees and working supervisors in other selected nonmanufacturing industries.

The employment data are for all full and part-time employees who worked or received pay for any part of the period reported.

The earnings data are gross, before payroll deductions and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those actually worked or paid for.

For government and certain other segments of employment, the employment reports of the Bureau of Labor Statistics are supplemented by data from the Interstate Commerce Commission, the Civil Service Commission, the Bureau of the Census and other agencies.

Because of a major revision, continuous data for many currently published series begin with January 1947. Continuity with data prior to 1947 has been maintained for total employment in nonagricultural establishments and the 8 major industry divisions; for total and production-worker employment in all manufacturing, durable and nondurable goods, the 21 major manufacturing industry groups, and the mining industries; for hours and earnings in all manufacturing, durable and nondurable goods, and the mining industries.

Output per man-hour.—The Bureau of Labor Statistics currently prepares annual measures of output per man-hour (or the reciprocal—unit man-hour requirements) by two methods. One involves the construction of industry-wide measures from secondary source material; the other, from establishment reports for specified products

selected to represent industry trends. Data under the first program are published for 24 manufacturing industries, 5 mining industries, 4 public utilities and agriculture. Indexes compiled from direct reports cover 18 manufacturing industries. Output per man-hour refers to production, in physical units, per man-hour of work. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. The data do not measure the specific contribution of labor or capital nor do they reflect increased efficiency resulting from more economical use of fuel and materials, or more efficient integration of industries.

Labor turn-over.—Labor turn-over rates are published monthly in the *Employment and Payrolls Report* of the Bureau of Labor Statistics for approximately 100 industries in 20 major groups in manufacturing and for selected nonmanufacturing industries, on the basis of about 7,000 reports from cooperating establishments. Labor turn-over data are available on a continuous monthly basis from January 1930 for manufacturing as a whole. Because of the adoption of the Standard Industrial Classification beginning with final data for December 1949, labor turn-over rates for many individual industries and industry groups are available on a continuous basis only from December 1949.

Work stoppages.—Statistical data on work stoppages due to labor-management disputes cannot be collected in the same fashion as other labor information since such stoppages are sporadic and cannot be covered by a routine periodic reporting service. The basic measures of strike statistics as now compiled by the Bureau of Labor Statistics are the number of stoppages, the number of workers involved, and the number of unions involved. Basic statistical data are obtained from the employers and unions involved. Leads to where strikes have occurred are obtained from a variety of sources, including newspapers, State employment services, or State and Federal mediation services. From the data given on the schedules, the Bureau prepares annual reports (published in the May *Monthly Labor Review* and later in bulletin form) which give not only the complete and verified total figures for each month of the year but also analyses of strikes by industry, State, city, and by causes, labor organizations involved, and other pertinent classification. Preliminary monthly, semi-annual, and annual figures are issued in press releases.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series D 1-10") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Sampling Note—Current Population Survey

The sample used for the Current Population Survey (Monthly Report on the Labor Force) consists of approximately 25,000 households living in 125 counties and independent cities grouped in 68 areas. The chances are about 19 in 20 that the relative sampling variability of the estimated totals presented from the labor force survey are less than the following:

SEX	CIVILIAN LABOR FORCE			Not in the labor force
	Total	Employed	Unemployed	
	Percent	Percent	Percent	Percent
Both sexes.....	2	2	18	4
Male.....	2	2	18	4
Female.....	5	5	20	2

The percentages shown in this table represent the maximum differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. These percentages are themselves subject to variation in different time periods, particularly as the magnitudes being estimated change in level. Estimates of change from one month to the next are subject to somewhat smaller sampling variability for some of the items.

The sampling variability indicated above is illustrative of the variability that is to be expected for other subjects, such as urban-rural distributions, migration, occupation, education, marital status, race, family relationships, income, etc. For specific evaluation of the sampling variability relating to these subjects, see the original releases of the Bureau of the Census.

¹ Data not adjusted for relatively minor differences in farm-nonfarm occupational classification between (a) 1820-1930 series, (b) figures for 1930 and 1940, and (c) figures for 1950.

² Figures estimated on basis of returns covering greater part of population.

³ Figures based on interpolation between 1820 and 1840.

⁴ Includes additions due to estimated under-enumeration in 13 Southern States.

⁵ Corrected figure; for explanation, see analysis of occupation returns for 1890 in Twelfth Census (1900) Special Reports, *Occupation*, pp. lxxi-lxxiii. Excludes persons in Indian Territory and on Indian reservations, areas specially enumerated at that census, but for which areas no occupation statistics are available.

⁶ Figures revised to deduct estimated over-reporting of farm workers.

⁷ Figures revised to add estimated under-reporting of gainful workers, partly due to change in census date to January 1.

⁸ Includes persons in experienced civilian labor force who did not report occupation.

⁹ Figure differs from corresponding item in table 224 due to separate tabulations.

¹ Figures for 1910 to 1930 represent gainful workers; those for 1940 and 1950 represent the total labor force. For differences in concepts, see text, p. 179.

² Including data for age unknown.

³ Based on 20-percent sample of 1950 Census returns. See source for explanation of sampling variability.

¹Data are arithmetic means of monthly estimates of persons employed during last complete calendar week in each month ending at least one day before last of month.

²Weighted averages of wage rates as reported quarterly by crop reporters. U. S. estimates affected by importance of rates in particular regions; see table 216.

³Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.

⁴Includes all persons doing one or more hours of farm work for pay during survey week. Members of operators' families doing any farm work for cash wages are counted as hired workers.

⁵New series of wage rates begun in 1948; for description of series, see *Farm Labor*, Dec. 1949.

No. 229.—INDEXES OF PRODUCTIVITY FOR SELECTED INDUSTRIES: 1929 TO 1951

[1939=100. Productivity refers to output in physical units per man-hour of work (or per worker in agriculture and telegraph). Indexes of output per man-hour obtained by dividing indexes of production by indexes of man-hours. For explanation of various indexes used, see *Handbook of Labor Statistics*, 1950, p. 166. See also *Historical Statistics*, series D 213-217]

INDUSTRY	1929	1933	1935	1937	1940	1945	1947	1948	1949	1950	1951
All manufacturing:											
Output per man-hour.....	78.1	81.9	90.8	90.0							
Mining: ¹											
Output per man-hour.....	69.9	78.8	84.9	88.0	102.1	106.1	111.1	110.9	108.6	117.4	
Agriculture:											
Output per worker.....	91.6	89.2	87.5	105.3	102.5	120.1	115.9	130.1	133.9	131.0	
Steam railroad transportation: ²											
Revenue traffic per man-hour.....	75.1	83.0	87.6	95.2	105.2	139.5	135.0	133.2	131.5	149.9	158.5
Electric light and power: ³											
Output per man-hour.....	54.1	68.1	82.5	89.6	108.6	182.5	167.0	171.0			
Telephone: ⁴											
Output per man-hour.....			88.2	88.8	103.0	98.8	94.0	93.3	99.1	104.5	
Telegraph: ⁵											
Output per employee.....			86.4	93.0	92.5	116.4	121.0	117.0	122.0	134.8	
SELECTED MANUFACTURING INDUSTRIES											
(Output per man-hour)											
Beet-sugar refining.....			82.6	86.9	104.2	79.6	93.1	91.8	104.5	115.0	105.0
Canning and preserving group.....	68.4	97.9	100.4	88.7	110.2	113.9	111.1	116.4	127.6	131.6	142.2
Cement.....	71.7	84.4	80.9	89.1	100.4	90.1	111.5	117.8	120.4	129.4	137.0
Clay construction products.....	88.0	87.8	84.3	88.2	105.2	88.0	106.1	114.9	117.3	125.9	127.0
Coke group.....	92.8	74.3	85.0	94.0	104.4	100.5	106.7	102.9	98.5	106.5	108.1
Glass containers.....					99.2	118.4	129.6	122.3	123.9	130.1	129.3
Hosiery group.....					109.0	131.4	114.9	118.3	127.3	138.1	146.5
Malt liquors.....					102.2	118.0	117.0	115.8	125.3	126.9	125.9
Paper and pulp.....	74.0	86.9	87.5	92.6	105.3	87.6	91.6	94.6	99.1	109.7	114.2
Primary smelting and refining of copper, lead, and zinc.....	89.5	88.5	76.2	87.6	103.7	89.5	95.1	93.9	96.9	106.7	99.7
Rayon and other synthetic fibers.....	30.4	60.7	67.8	79.4	113.4	170.2	206.9	235.5	239.9	286.1	302.5
Tobacco products group.....	63.7	73.7	86.7	90.5	100.6	115.7	115.8	123.3	131.2	137.1	140.7

¹ For 1929 and 1933, covers almost all industries; for 1935 to 1950, represents 6 principal industries (bituminous coal; anthracite; crude petroleum, natural gas and natural gasoline; iron; copper; and lead and zinc).

² Refers to Class I steam line-haul railroads. ³ Refers to privately owned utilities.

⁴ Refers to Class A telephone carriers.

⁵ For principal wire-telegraph and ocean-cable carriers. As satisfactory data on average weekly hours are not available before 1943, an index of output per man-hour is not presented.

No. 230.—GROSS AND NET SPENDABLE AVERAGE WEEKLY EARNINGS OF PRODUCTION WORKERS IN MANUFACTURING INDUSTRIES, IN CURRENT AND 1947-49 DOLLARS: 1939 TO 1952

[Net spendable average weekly earnings represent average gross earnings of production workers in manufacturing industries less social security and income taxes for which specified worker is liable. These net spendable average weekly earnings are then divided by the Bureau's consumers' price index adjusted to an average 1947-49 base, to obtain net spendable weekly earnings in 1947-49 dollars]

PERIOD	GROSS AVERAGE WEEKLY EARNINGS		NET SPENDABLE AVERAGE WEEKLY EARNINGS			
			Worker with no dependents		Worker with three dependents	
	Amount	Index (1947-49 = 100)	Current dollars	1947-49 dollars	Current dollars	1947-49 dollars
1939.....	\$23.86	45.1	\$23.58	\$39.70	\$23.62	\$39.76
1940.....	25.20	47.6	24.69	41.22	24.95	41.65
1941.....	29.58	55.9	28.05	44.59	29.28	46.55
1942.....	36.65	69.2	31.77	45.58	36.28	52.05

No. 235.—INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1943 TO 1952

[Data for recent years cover 77 cities. From 1943 to 1946 study made as of July 1. Since 1947 data collected as of July 1 for all trades except streetcar and bus operators for whom data are shown as of Oct. 1, and printing data for 1948 as of Jan. 2. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. Year to year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. For indexes based on 1939=100, see also *Historical Statistics*, series D 152-163]

[1947-49 average=100, except for printing where 1948-49 average=100]

No. 237.—SELECTED INJURY-FREQUENCY AND SEVERITY RATES: 1946 TO 1951

[Frequency rate is average number of disabling injuries for each million employee-hours worked. Severity rate is average number of days lost for each thousand employee-hours worked. Standard time-loss ratings for fatalities and permanent disabilities are given in *Method of Compiling Industrial Injury Rates*, approved by American Standards Association, 1945]

No. 238.—MONTHLY LABOR TURN-OVER RATES (PER 100 EMPLOYEES) IN MANUFACTURING INDUSTRIES: 1939 TO 1952

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in table 212, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. Labor turn-over data, beginning in Jan. 1943, refer to wage and salary workers. The turn-over sample is not so extensive as that of the employment survey—proportionately fewer small plants are included; printing and publishing (since April 1943), canning and preserving, and several other industries are not covered.]

CLASS OF TURN-OVER AND YEAR	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

¹ Includes duplication where same workers were involved in more than 1 stoppage during year.

² "Total employed workers" includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, "total employed workers" includes all employees except following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of nature of work cannot or do not strike (such as college professors, clergymen, and domestic servants). Self-employed and unemployed persons are excluded.

³ Obtained by multiplying average number of employed workers each year by number of days worked by most employees during year.

Source: Department of Labor, Bureau of Labor Statistics; *Handbook of Labor Statistics* and other records. Basic data are currently published in May issues of *Monthly Labor Review*.

¹ Strikes affecting more than 1 industry have been counted as separate strikes in each industry affected, with proper allocation of workers and man-days idle.

² Includes duplication where same workers were involved in more than 1 stoppage during year.

³ Includes industries not shown separately.

9. Military Services and Veterans' Affairs

This section includes data on the Army, the Navy, the Air Force, Selective Service, and on the various aspects of government programs for veterans.

Military services.—Data on the activities and status of the military services are compiled from information supplied by the various branches of the Armed Forces, the Bureau of the Budget, the Bureau of Labor Statistics, and the Selective Service System. For additional figures showing Federal Government expenditures on military services by branch of service, see Section 14, Federal Government Finances and Employment.

Veterans' Administration.—The Veterans' Administration administers laws authorizing benefits for former members of the armed forces and for the dependents and other beneficiaries of deceased former members of such forces. The Veterans' Administration benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for non-service-connected disability or death; emergency officers' retirement pay; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans and, under certain conditions, direct home loans; readjustment allowances for unemployment or self-employment; U. S. Government and National Service Life Insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; World War I adjusted service certificates; a guardianship program for the protection of estates derived from Veterans' Administration benefits paid to incompetent or minor beneficiaries; burial allowances; and burial flags.

Note.—This section presents data for the most recent year or period available on March 17, 1953, when the material was organized and sent to the printer.

¹ Excludes pay of retired and inactive reserve personnel.

² Prior to March 1944, includes persons on induction furlough; prior to June 1942 and after April 1945, includes Philippine Scouts.

³ Covers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.

⁴ Covers Navy, Marine Corps, and Coast Guard. For Navy proper and Coast Guard, includes cash payments for clothing allowance balances.

⁵ Includes men's share of family allowances but excludes Government's contribution. Represents actual expenditures for Army through April 1947 and for Coast Guard for all periods. Other data represent estimated obligations based on monthly personnel count.

⁶ Represents Government's contribution. Excludes men's share.

⁷ Includes leave payments of \$716,313,000 in 1946, \$1,528,227,000 in 1947, \$37,127,000 in 1948, \$639,000 in 1949, and \$140,000 in 1950 (representing face value of bonds and cash payments) to enlisted personnel discharged prior to Sept. 1, 1946, for accrued and unused leave, and to officers and enlisted personnel then on active duty for leave accrued in excess of 60 days.

⁸ Data for January-June only. Starting July 1950, data restricted. * Family allowances included under payroll.

Source: Department of Labor, Bureau of Labor Statistics. Current data restricted.

No. 244.—FEDERAL GOVERNMENT EXPENDITURES FOR MILITARY SERVICES AND VETERANS' SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1915 TO 1953

[Amounts in millions of dollars. For fiscal years ending June 30. Categories are from the functional classification of Budget expenditures (see table 370). Figures include expenditures of agencies, other than military and Veterans' Administration, for activities primarily related to military and veterans' programs. For example, figures for military services include General Services Administration expenditures for stockpiling of strategic and critical materials, and expenditures of the National Advisory Committee for Aeronautics. Similarly, figures for veterans' services and benefits include General Services Administration expenditures for veterans' educational facilities and expenditures of the Department of Labor, Bureau of Veterans' Reemployment Rights. Figures exclude expenditures for programs which, though closely related to military or veterans' services, have a primary relationship to other categories of the functional classification. Examples of expenditures excluded are those by Corps of Engineers for rivers and harbors (included in Transportation and Communication and in Natural Resources), and those by Veterans' Administration for direct loans to veterans to aid in purchase of homes (included in Housing and Community Development). For further detail as to classification of particular items in 1952 and 1953, see Special Analysis B of the *Budget of the United States, 1954*, pp. 1079-90]

¹ Includes Philippine Scouts; excludes contract surgeons. Data for 1925-47 include personnel in Army Air Forces and its predecessors (Air Service and Air Corps). For 1948 and 1949 includes Air Force personnel assigned to Army command; excludes Army personnel assigned to Air Force command. Beginning 1950, figures consist entirely of Army Department personnel, since Air Force Department personnel no longer assigned to U. S. Army organizations. ² Nurse Corps included with officers. ³ Includes field clerks.

⁴ Includes 178 Navy medical officers on duty with Army.

⁵ Number of women in services 1925 to 1940 relatively small.

⁶ 1948 and 1949 include Army personnel assigned to Air Force command; exclude Air Force personnel assigned to Army command. No Air Force personnel assigned to Army command beginning 1950.

⁷ Included in Air Force. ⁸ Included in Army.

⁹ Includes 9,787 Army personnel in training for subsequent assignment to Air Force commands.

World War II.....	¹⁰ 10, 400, 000	⁹ 306, 005	175, 407	26, 706	15, 120	¹⁰ 88, 772	¹¹ 571, 822	¹² 114, 558	¹³ 1, 204

¹ Estimates on total troops run from 250,000 to 395,000. Greatest strength of Continental Army was about 35,000 in November 1778.

² Number of battle deaths accounted for on available records. Total number undoubtedly much larger. No figures available on deaths by disease or other causes.

³ Believed to represent enlistments and not individual soldiers, hence is considerably in excess of actual number of troops employed.

⁴ Number who died of disease cannot be definitely determined. Records show 10,966 "ordinary deaths" and 411 accidental and other deaths. It is believed that many who died of wounds are reported as cases of ordinary deaths.

⁵ Union only. Number of deaths believed to be somewhat larger as records, especially those of southern prisoners, are far from complete.

⁶ Not available.

⁷ Number incurred among 182,674 individuals.

⁸ Represents Army and Air Force personnel, Dec. 1, 1941 through Aug. 31, 1945.

⁹ Represents Army and Air Force personnel for period, Dec. 1, 1941 through Dec. 31, 1945. Battle casualties audited as of July 1, 1946, subject to change. Nonbattle casualties based on records through Jan. 31, 1948.

¹⁰ Includes 23,042 declared dead, 11,332 died of other causes as a result of battle, and 562 reported dead from missing in action. Includes deaths from accidents, homicide, and suicide.

¹¹ Excludes 26,706 who subsequently died of wounds.

¹² Excludes 11,332 who died of other causes (see footnote 10).

¹³ Excludes 23,042 declared dead, 562 reported dead from missing in action (see footnote 10), and 23,941 who were returned to duty. An audit, as of Sept. 30, 1947, shows a new balance of 12 remaining in a missing status.

No. 252.—SUMMARY OF SELECTIVE SERVICE DATA, BY STATES AND OTHER AREAS, AS OF JUNE 30, 1952

[State allocations of registrants forwarded by Selective Service local boards for examination and induction are affected by number of voluntary enlistments and number ordered to active duty as Armed Forces reserves in addition to number deferred and eligible. Each State is credited with its inductions as well as its enlistments and reserves called to active duty. Because of time lag in reporting to local boards, credits given for each State are not necessarily in complete accord with present strength of Armed Forces contributed by that State]

¹ Legally exempted registrants; no longer liable for service because of age.

² Cumulative since the inception of the Universal Military Training and Service Act, as amended, September 1948.

³ Includes voluntary enlistments and deferments between time of preinduction examination and notice of induction.

⁴ Cumulative net credits resulting from inductions plus home address reports minus separation reports, as reported by the armed forces September 1948 through June 1952.

No service in World War II.....	-----	-----	-----	-----	-----	-----	76	379
And service in World War II.....	-----	-----	-----	-----	-----	-----	150	542
World War I ⁴	3,821	3,768	3,711	3,651	3,587	3,518	3,446	3,381
Other wars and Regular Establishment ⁵	208	200	190	180	174	172	167	160

¹ Excludes persons who served in the Armed Forces only in peacetime (Regular Establishment) unless they are receiving Veterans' Administration compensation for service-connected disability. A small but unknown number of persons with service in two or more periods prior to June 27, 1950 are included more than once. Veterans with service both in World War II and since June 27, 1950 are counted only once.

² Estimated cumulative returns to civil life since September 16, 1940 of all persons who served in the Armed Forces of the United States at any time through July 25, 1947 (including persons who served both in that period and since June 27, 1950), less estimated deaths out of service and less estimated returns to active duty from civil life.

³ Estimated cumulative returns to civil life since June 27, 1950 of all persons who served in the Armed Forces of the United States since that date (including persons who had also served in World War II), less estimated deaths out of service and less estimated returns to active duty from civil life.

⁴ Estimated by application of appropriate survival rates to the 1918 age distribution of World War I participants. Includes veterans of Civil War, Indian Wars, Spanish-American War. Only former members of Regular Establishment (peacetime service only) who are receiving Veterans' Administration compensation for service-connected disability are included. Spanish-American War totals estimated by application of appropriate survival rates to the 1902 age distribution of living Spanish-American War participants.

¹ \$65,866,513,056 was paid from appropriations and \$11,919,430,753 from trust and working funds.

² War of the Revolution, \$70,000,000; War of 1812, \$46,218,391; Indian Wars, \$107,863,042; Mexican Wars, \$61,763,723; unclassified, \$16,513,426; Korean Conflict, \$21,154,282; \$268,114 for participants in yellow fever experiments, 1932-51.

³ Includes a cumulative adjustment for prior years of \$225,715,729.

⁴ Amount transferred by voucher to NSLI trust fund for payment of claims traceable to extra hazards of military or naval service and certain direct payments.

⁵ Includes special dividend as follows: 1950, \$2,634,537,050; 1951, \$221,619,914; and 1952, \$556,362,479.

⁶ Includes amounts reimbursed to U. S. Government Life Insurance fund on account loans made from that fund.

⁷ Includes expenditures from funds allotted under National Recovery Act of 1933, Public Works Administration Act of 1938 and Grants to Republic of Philippines for construction and equipping of hospitals for fiscal year 1952, \$200,000. Also includes \$415,323,692 transferred to the Department of the Army, Corps of Engineers, for the construction of hospitals as follows: 1946, \$7,500,000; 1947, \$135,250,000; 1949, \$90,000,000; 1950, \$100,000,000; 1951, \$42,573,692; and 1952, \$40,000,000.

⁸ Includes salaries and other administrative costs. Also includes fees for counseling of veterans; partial benefit payments made under Public Laws 16 and 346 for fiscal years 1944-47; reimbursement to States for administrative expenses, and expenditures under Federal Tort Claims Act. Medical, hospital and domiciliary services costs included beginning fiscal year 1932; expenditures for State and Territorial Homes included beginning fiscal year 1934.

⁹ Includes expenditures for medical, hospital and domiciliary services prior to fiscal 1932; National Home for Disabled Volunteer Soldiers and State and Territorial Homes prior to fiscal year 1934; payments for subsistence, tuition, supplies, and equipment under Public Law 16; burial allowances; homes for paraplegics; automobiles and other conveyances for disabled veterans; vocational training (World War I); allotments and allowances; marine and seamen's insurance; operation of Civil Service and Canal Zone retirements and disability systems to August 31, 1934; Servicemen's Indemnities; Veterans' Special Term Insurance; Service Disabled Veterans' Insurance; and other miscellaneous expenditures.

¹⁰ Includes a cumulative adjustment for prior years of \$99,935,268.

No. 258.—U. S. GOVERNMENT LIFE INSURANCE AND NATIONAL SERVICE LIFE INSURANCE IN FORCE, BY PLAN, AS OF JUNE 30, 1952

[Amounts in thousands of dollars. Veterans' Administration operates two insurance programs: (1) United States Government Life Insurance for veterans of World War I; and (2) National Service Life Insurance for veterans of World War II and later. These two programs are segregated and administered separately in all particulars]

PLAN	UNITED STATES GOVERNMENT LIFE INSURANCE		NATIONAL SERVICE LIFE INSURANCE							
			Fund ¹		Appropriation ²		Service-disabled veterans fund ³		Veterans special term fund ⁴

Paid-up insurance.....	3,411	6,822	1,440	1,254	1	1				

¹ Fund is administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from the fund for death claims, dividends, and other benefits. Government, however, bears cost of administration of this fund in addition to expenses for certain types of losses.

² Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between October 8, 1940 and September 2, 1945.

³ For veterans discharged on or after April 25, 1951 with service-connected disability which would be compensable, if ten percent or more in degree.

⁴ For veterans who were entitled to indemnity protection under the Servicemen's Indemnity Act of 1951 and who were ordered to active service for a period in excess of 30 days; no medical examination required. Issued only on the 5-year renewable nonconvertible term plan.

No. 262.—VETERANS RECEIVING HOSPITAL OR DOMICILIARY CARE AUTHORIZED BY VETERANS' ADMINISTRATION: 1932 TO 1952

[During fiscal year 1952, 2,492,361 visits were made by veterans to staff or fee physicians for out-patient medical care. On June 30, 1952, 7,550 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of \$120 per year through August 1939, \$240 per year through December 17, 1943, \$300 per year through May 31, 1948, and \$500 per year thereafter]

YEAR ENDING JUNE 30—	Total receiving hospital or domi- ciliary care at end of year	VETERANS RECEIVING HOSPITAL TREAT- MENT, ALL FACILITIES AND HOSPITALS ¹						Veter- ans re- ceiving domi- ciliary care at end of year	VETERANS' ADMINISTRATION FACILITIES

10. Social Security and Related Programs

Broadly considered, "social security" includes (1) all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the wage loss resulting from old age, sickness, disability, unemployment, or death (social insurance and related programs); (2) assistance, or payments on a needs basis, to persons with inadequate income (public aid); and (3) medical and hospital care and services to individuals to improve their health, earning power, and welfare (health and medical services and other welfare services).

The *Social Security Bulletin* carries current data on many of these programs, and summarizes annual data for them in an annual Statistical Supplement. Summary data have also appeared in the *Annual Report of the Federal Security Agency*.

Social insurance for industrial and commercial workers.—The two social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age or death (Federal old-age and survivors insurance) or unemployment (Federal-State unemployment insurance). In addition, three States—Rhode Island, California, and New Jersey—administer cash benefits for workers covered by the State unemployment insurance law who suffer a wage loss because of temporary disability; temporary disability benefits are also paid in New York under a law patterned on workmen's compensation and administered by the State workmen's compensation board. In general, these programs cover employment in industry and commerce. The major groups presently excluded under old-age and survivors insurance are the self-employed in certain professions, self-employed farmers, farm and domestic workers not "regularly" employed, and most Federal Government employees.

Old-age and survivors insurance provides monthly retirement benefits to fully insured workers (see table 277) at age 65 or over and supplementary monthly benefits to their wives, if they are aged 65 or have a child of the wage earner in their care, to dependent husbands, and to dependent children under age 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers. A lump-sum death payment is made in the case of all insured deaths.

Covered workers and their employers each pay contributions of 1.5 percent on the worker's wages, not counting amounts above the first \$3,600 in a year. The rate is scheduled to rise by steps until it reaches 3.25 percent each in 1970. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid.

State unemployment insurance laws pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 16 to 26 weeks among the States; maximum weekly benefits range from \$20 to \$30 under the several State laws. In 10 States maximum allowances for dependents ranging from \$5 to \$18 raise the range of maximum augmented benefits to \$26 to \$48.

The standard rate of contributions payable by employers for unemployment insurance (Federal and State) is 3.0 percent of the first \$3,000 a year paid to an employee. All States adjust employer contribution rates according to their experience with the risk of unemployment, so that total Federal and State contributions may be considerably less than 3.0 percent; in 10 States with penalty rates, combined contributions may be more than 3.0 percent. In 2 States, employees also contribute. Contributions collected by States are deposited to State accounts in the Federal unemployment trust fund, from which States withdraw amounts needed for benefit payments. The Federal Government makes grants to States to cover administrative costs of State systems that meet statutory Federal requirements.

Note.—This section presents data for the most recent year or period available on March 17, 1953, when the material was organized and sent to the printer.

Social insurance for railroad workers.—The social insurance programs under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads (including the Railway Express Agency and the Pullman Company) subject to part I of the Interstate Commerce Act, affiliated companies such as refrigerator-car loan companies performing services connected with railroad transportation, organizations such as railroad and traffic associations maintained by two or more covered employers, and standard railway-labor organizations, national in scope. These programs are administered by the Railroad Retirement Board, which publishes operations data in its *Monthly Review* and *Annual Report*.

The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and monthly and lump-sum benefits to survivors of deceased workers. The credits of employees who die or retire with less than 10 years of railroad service are transferred to old-age and survivors insurance under the Social Security Act, and any benefits which may be due (except a residual payment) are paid under that program.

Funds for the retirement and survivor system come from a tax on earnings up to \$300 a month under the Railroad Retirement Tax Act. The tax, divided equally between the employer and employee, is now at the maximum rate of 12½ percent.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness (including maternity). Benefits ranging from \$3.00 to \$7.50 per day are payable for each day over 7 in the first 14-day registration period, and over 4 in subsequent registration periods, up to a maximum of 130 days in a benefit year for each type of benefit. The most recent changes in the Railroad Unemployment Insurance Act became effective on July 1, 1952; consequently, the data in the tables do not reflect the higher benefit rates described here.

The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from ½ to 3 percent of payrolls (exclusive of individual earnings in excess of \$300 a month). Since January 1, 1948, the minimum rate has been in effect.

Retirement systems for Federal Government employees.—One contributory retirement system for Federal civilian employees and two noncontributory systems (for special classes of employees) are administered by the Civil Service Commission. In addition, there are separate retirement systems, some contributory and others noncontributory, in operation for the armed forces and special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government and in the municipal government of the District of Columbia not subject to another retirement system, except those employees excluded by executive order because the tenure of employment is intermittent or of uncertain duration. It also provides annuities for the widows and minor children of deceased employees, and, under certain conditions, to the survivors of deceased annuitants. Approximately 1,700,000 employees were subject to this Act as of June 30, 1952. The employee contribution rate, computed on base pay, has been 6 percent since July 1948.

The Act does not require specific payments from the Government as employer, but implies that the Government will furnish the amounts necessary to finance the fund and to continue the Act in full force and effect. Appropriations have been made annually by the Congress to the fund since the fiscal year 1929.

Workmen's compensation.—All States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States, total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-third of the laws, there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Public assistance is provided through five major programs, all administered by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any of the four programs established by the Social Security Act, a State must have a plan approved as meeting the requirements of the Federal Act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall get.

Health and welfare service.—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, and control of specific diseases). The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service, both units of the Department of Health, Education, and Welfare.

FIG. XIX.—SOCIAL SECURITY OPERATIONS: 1942 TO 1952

[Old-age and survivors insurance: Average monthly number and amount of monthly benefits (current payment status). Unemployment insurance: Average weekly number of beneficiaries and average monthly amount of benefits paid under all State laws. Public assistance: Average monthly number of recipients and average monthly amount of payments under all State programs]

INDIVIDUALS RECEIVING PAYMENTS

SOCIAL SECURITY PAYMENTS

¹ Receiving old-age, wife's or husband's, widow's or widower's, or parent's benefit. Beginning September 1950, includes a small proportion of wife beneficiaries under age 65 with child beneficiaries in their care.

² Children plus one adult per family when adults are included in assistance group; before October 1950, partly estimated.

³ Program initiated October 1950.

¹ State unemployment insurance and employment service programs.

² Excludes expenditures from Government life insurance fund.

³ Includes expenditures for medical services, approximately \$185 million in 1950 and \$210 million in 1951. Includes payments by employers and private insurance carriers of benefits payable under public law.

⁴ Excludes administrative expenditures.

⁵ Old-age assistance, aid to blind, aid to dependent children, and beginning October 1950, aid to permanently and totally disabled.

⁶ Excludes all medical expenditures of Military Establishment and Atomic Energy Commission; health services provided in connection with public education; medical services included under public aid programs above; medical care included under workmen's compensation above; international health activities; professional training of nurses, physicians, etc.; and expenditures for medical services and research subordinate to performance of other functions.

⁷ Federal includes programs for maternal and child health services and for crippled children. State and local expenditures represent required matching of Federal grants.

⁸ Federal represents Veterans' Administration programs for vocational rehabilitation, automobiles and other conveyances for disabled veterans, housing for paraplegic veterans and domiciliary care for veterans; State and local are for bonus and other payments and services to veterans.

¹ Average monthly number, except as otherwise noted.

² Includes a small but unknown number and amount of disability and survivor beneficiaries and benefits.

³ Old-age retirement data include small amount of survivor payments and, for years prior to 1950, significant amount of disability payments now shown separately.

⁴ Benefits for fiscal year (usually ending June 30); beneficiaries for last month of fiscal year. Data for 1950 and 1951, preliminary.

⁵ Under Veterans' Administration. Retirement data only for veterans of Spanish-American War, Boxer Rebellion, and Philippine Insurrection. Disability data include pensions and compensation, and subsistence payments to disabled veterans undergoing training. Lump-sum payments are for burial of deceased veterans.

⁶ Comparable data not available.

⁷ A small but unknown amount of lump-sum death payments included with monthly survivor payments. Disability benefits exclude payments for medical care. Data for 1950 and 1951, preliminary.

⁸ Benefits payable in Rhode Island beginning April 1943, in California beginning December 1946, and in New Jersey beginning January 1949. Excludes New York; data not available. Includes private-plan benefits in California and New Jersey and private-plan beneficiaries in California. Maternity data included for Rhode Island; hospitalization benefits excluded for California. Number represents average weekly number of beneficiaries.

⁹ Number represents average number of beneficiaries during 14-day registration period. Temporary disability benefits first payable July 1947; includes maternity data.

¹⁰ Average weekly number.

¹¹ Average monthly number.

¹ Excludes number under railroad-retirement program.

² Partly estimated. Quarterly data unadjusted for workers employed during quarter but not reported after quarter in which they received their first \$3,000 in year prior to 1951, and \$3,600 in year after 1950.

³ Unadjusted for nontaxable wages erroneously reported and wages excluded in benefit computations. Wages in excess of \$3,000 a year prior to 1951 and \$3,600 a year after 1950 paid to worker by any 1 employer are not taxable.

⁴ Partly estimated. Quarterly data adjusted for workers employed during quarter but not reported after quarter in which they received their first \$3,000 in year prior to 1951 and their first \$3,600 in year after 1950.

⁵ Includes all wages of workers earning over \$3,000 a year prior to 1951 and \$3,600 a year after 1950.

⁶ Preliminary, except employee accounts established.

⁷ Except for employee accounts established, excludes newly-covered self-employed persons. Although quarterly data on employment and earnings including self-employed persons are not available, annual estimates are obtainable for all covered persons. Annual totals for 1951, including the self-employed, are: 58 million workers; \$119.5 billion in taxable earnings; \$2,060 average taxable earnings per worker.

¹ Distribution by type estimated. Supplementary benefits paid to wives, dependent aged husbands and children of retired (old-age) beneficiaries. Survivor benefits paid to following survivors of deceased insured workers: Aged widows, dependent aged widowers, children, younger widows with child beneficiaries in their care, or dependent aged parents.

² Payable with respect to workers who died after December 1939, and before September 1950, if no survivor could be entitled to monthly benefits for month in which worker died, or with respect to all workers who died after August 1950.

³ Exceeds number of deceased workers with respect to whose wage records payments were certified.

⁴ Less than 80.

⁵ Less than \$500.

No. 277.—OLD-AGE AND SURVIVORS INSURANCE—SAMPLE (1 PERCENT) OF WORKERS WITH WAGE CREDITS AT SOME TIME IN 1937-50, BY CUMULATIVE WAGE CREDITS IN 1937-50, INSURANCE STATUS JANUARY 1, 1951, AND AGE GROUP

[1-percent sample of all workers with wage credits identified for posting by July 1951, only partly adjusted for duplication of workers with more than 1 account. Includes workers who became entitled to benefits before Jan. 1, 1951, and all but 2,229 of the workers dying during the period 1937-50. Age represents age at birthday in 1950. Since data are derived from a sample, they are subject to a sampling variation which may be relatively large where figures shown are small. Because of mechanical processes and extent of adjustments for delayed wage records, data may differ slightly from corresponding data in other published tables. Data corrected to Jan. 6, 1953]

¹ Includes 6,726 workers of unknown age, of whom 946 were fully insured and 5,780 were uninsured.

² Includes 2,229 workers who were currently insured at death prior to September 1950 on whose wage records benefits were awarded.

³ No workers in sample cell.

⁴ If a worker is fully insured as of a given date, certain of his survivors, in event of his death on or before that date, are eligible for survivors benefits. In addition, all fully insured workers who have attained age 65 are eligible for old-age benefits. An uninsured worker is one on basis of whose wage record no benefits would be payable. Changes in insurance status resulting from wage credits for military service and coordination with Railroad Retirement programs are only partially reflected.

¹ Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown are in effect for 1950 and 1951.

² Estimated number of different workers in each State who have earned wages in covered employment sometime during calendar year. Totals adjusted to eliminate duplication due to shifting of workers between States during year.

³ A average of 12 monthly figures, each of which is total of number of workers in covered employment in pay period of each type (weekly, semimonthly, etc.) ending nearest 15th of month.

⁴ Total wages in covered employment for all pay periods ending in year.

⁵ And wages of \$100 in any calendar quarter.

⁶ And wages of \$75 in a calendar quarter. ⁷ Or 25 in 1 week.

⁸ Wages of at least \$50 to each of at least 4 workers during each of 3 calendar quarters.

⁹ But 8 in 20 weeks for employers located outside the corporate limits of a city, village, or borough of 10,000 or more population. ¹⁰ Or wages of \$500 in a calendar year. ¹¹ Or wages of \$10,000 in any calendar quarter.

¹² And wages of \$225 in any calendar quarter. ¹³ Or wages of \$450 in a calendar quarter.

¹⁴ And wages of \$500 in same calendar quarter. ¹⁵ And wages of \$140 in any calendar quarter.

¹⁶ Or wages of \$6,000 in preceding calendar year. Includes employers with wages of \$10,000 in a calendar quarter toward which not more than \$1,000 per employee need be counted. ¹⁷ And wages of \$500 in a calendar year.

¹ Industry titles from 1942 edition of *Social Security Board Industrial Classification Code* for nonmanufacturing industries and 1945 edition of *Standard Industrial Classification Manual* for manufacturing industries.

² Average of 12 monthly figures, each of which is total of numbers of workers in covered employment in pay period of each type (weekly, semimonthly, etc.) ending nearest fifteenth of month.

³ Total wages in covered employment for all pay periods ending in year.

⁴ Less than 0.05 percent of total.

⁵ Excludes railroad and allied groups subject, as of July 1, 1939, to Railroad Unemployment Insurance Act.

⁶ Includes data for firms whose activities are not classifiable in any of above industries and data for firms not yet classified due to lack of sufficient information regarding nature of business.

¹ Excludes railroads and allied groups subject as of July 1, 1939, to Railroad Unemployment Insurance Act.² Until January 1945, represents covered employment on last payroll of each type (weekly, semimonthly, etc.) ending in month; thereafter, employment on payroll of each type ending nearest fifteenth of month. Annual figures represent averages of 12 monthly figures.³ Total wages in covered employment for all pay periods ending within period.⁴ Annual figures represent first payments made to beneficiaries; monthly figures represent average weekly number of weeks of unemployment compensated during month.⁵ Beginning with January 1949, represents weeks claimed by continued claims.⁶ Annual amounts adjusted, but monthly figures not adjusted, for voided benefit checks.⁷ Includes \$1,019,000 for 1947, \$3,331,000 for 1948, \$1,287,000 for 1949, and \$312,000 for 1950 paid to seamen under the Reconversion Unemployment Benefits for seamen program. Program expired June 30, 1950.⁸ Not available.

¹ Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various age and length of service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions: number of survivor annuities in force as of June 30 increased from 26 in 1941 to 39,902 in 1952. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62; such annuitants increased from 5 as of June 30, 1942, to 32,182 as of June 30, 1952. Prior to 1952, excludes annuities purchased by voluntary contributions.

² Data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund.

³ Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died while in service or after separation.

⁴ Data relate to refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

⁵ Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

No. 292.—WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1942 TO 1951

[Estimated by Social Security Administration. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator*), net disbursements of State funds (from *Spectator*, *Argus Casualty and Surety Chart*, and State reports; estimated for some States), and self-insurance payments (estimated from available State data). Calendar year data, except fiscal year data for Federal employees, for a few States with State funds, and for 1949 figures for Montana and 1949-1951 for West Virginia. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Base Compensation Act for States in which such payments are made]

¹ Includes children and 1 parent or other adult in families in which adult was considered in determining amount of assistance.

² Includes 534 recipients of payments made without Federal participation in California, 12 in Washington, 941 in Missouri, and 6,291 in Pennsylvania.

³ Partly estimated; total not as large as sum of State figures because of adjustment. See footnote 7.

⁴ Excludes some cases for program not administered by State agency. ⁵ Estimated.

⁶ Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.

⁷ Includes unknown number of cases receiving medical care, hospitalization, or burial only.

⁸ Represents program administered without Federal participation.

Source: Department of Health, Education, and Welfare, Social Security Administration, Bureau of Public Assistance. Data appear periodically in *Social Security Bulletin*.

11. Income and Expenditures

The income statistics in this section are of two fundamental types: First, those which provide data on aggregate amounts (national income and national product data) and second, those which provide data on the distribution of families or persons by size of their income (size distribution data). Statistics representing the former type are compiled primarily by the Office of Business Economics of the Department of Commerce and are based on a wide variety of data from government and private sources. Statistics representing the latter type of income data are derived from sample surveys of income conducted by several different agencies. Since these surveys were taken at different times and for different purposes, they differ somewhat in the definitions of income and the income-receiving unit. In addition to the income data, expenditures and savings of families and single persons have been included in this section.

Nation's economic accounts.—The Nation's economic accounts are designed to give a synoptic picture of the economy. (See table 303.) They show the magnitudes of income and expenditure of major economic groups, net additions and absorption of saving by these groups, and the gross national product or income. Statistics are based on the "National income and product" accounts of the Department of Commerce.

Business receipts retained include corporate retained earnings plus inventory valuation adjustment and capital consumption allowances of all business. Government receipts and expenditures are shown on an income and product account basis, rather than on either a cash or a conventional budget basis, so as to be consistent with the receipt and expenditure accounts of the other sectors and with the gross national product total. Government transfer payments, such as social security and veterans' benefits and interest charges represent income to the recipients, but are not included in the gross national product. Therefore, these payments are subtracted from both receipts and expenditures.

A fuller explanation of the Nation's economic accounts may be found in the Annual Review of the Council of Economic Advisers, included in the *Economic Report of the President to Congress*.

Aggregate income.—The aggregate income statistics presented here are of three general types: Gross national product or expenditure, national income (by distributive shares and by industrial origin), and income payments to individuals by States.

Gross national product is the market value of the output of goods and services produced by the Nation's economy, before deduction of depreciation charges and other allowances for business and institutional consumption of durable capital goods.

Note.—This section presents data for the most recent year or period available on March 17, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

Other business products used up by business in the accounting period are excluded. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Gross national product comprises the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. Gross national product differs from national income mainly in that no allowance is made for depreciation or for indirect business taxes, both of which items constitute expenses in the computation of business net incomes.

National income is the aggregate earnings of labor and property which arise from the current production of goods and services by the Nation's economy. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are recorded in the forms in which they accrue to residents of the Nation, inclusive of taxes on those earnings.

National income originating by industry is the sum of factor costs incurred by the industry in production. Hence, it is the net value added to production by the industry, measured at factor costs.

Personal income is the current income received by persons from all sources, inclusive of transfers from government and business but exclusive of transfers among persons.

Income payments to individuals is a measure of income received from all sources during the calendar year by residents of each State. It comprises income received by individuals in form of (1) wages and salaries, after deduction of employees' contributions to social security, railroad retirement, railroad unemployment insurance, and government retirement programs; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, consisting of dividends, interest, and net rents and royalties; and (4) "other" income, which includes public assistance and other direct relief; labor income items such as work relief, government retirement payments, veterans' pensions and benefits, workmen's compensation, and social insurance benefits; mustering-out payments to discharged servicemen; family-allowance payments and voluntary allotments of pay to dependents of military personnel; enlisted men's cash terminal leave payments; and State government bonuses to veterans of World War II. For discussion of distribution by State, see headnote, table 312.

Size distribution of income.—The statistics on the size distribution of income are based on data collected in various field surveys of income which have been conducted since 1936. The primary purpose of these field surveys was to show the distribution of families or persons by income levels rather than the aggregate amounts of income received by these families. Whereas the aggregate income data provide an indication of the level of total purchasing power, the field survey size distribution data, by showing the numbers and kinds of families and persons in each income bracket, provide an indication of the distribution of purchasing power in the population. In each of these field surveys trained enumerators interviewed representative samples of the civilian noninstitutional population with respect to the income received by the respondents or their families during the previous year.

The income represented in these tables is consumer money income, defined as the sum of civilian money wages and salaries; net farm entrepreneurial income; net nonfarm entrepreneurial income from business or profession; interest, dividends, and periodic income from estates and trusts; rents and royalties; armed forces pay of persons living in private households at the time of the survey; dependency allotments and contributions from members of the armed forces; veterans payments; social security payments, unemployment and workmen's compensation, pensions and assistance; and miscellaneous items such as periodic contributions for support from persons not

in the household, periodic payments from insurance policies or annuities, and alimony. The income is for the calendar year and is before deduction of income taxes or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is comparable with consumer money income. The nearest approximation is personal income.

Expenditures and savings.—The Bureau of Labor Statistics most recent survey of family income, expenditures, and savings on a Nation-wide basis for which tabulations are available is for the year 1944. The Survey of Prices Paid by Consumers in 1944 was based on a sample of 1,700 families and single persons in 28 metropolitan districts and 20 cities with populations under 50,000 outside of metropolitan districts. These places were selected to represent (with respect to region, State and city size) all cities in the United States with a population of 2,500 or more.

For this study a family is defined as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. A single person is one who lives alone or with unrelated people in a private home, lodging house, or hotel. From 1945 through 1949, the Bureau has made similar surveys of family expenditure in selected cities each year to obtain data necessary to check the prices and weighting patterns used in the consumers' price index; 1945 expenditure data were obtained for Birmingham, Ala.; Indianapolis, Ind.; and Portland, Oreg. (see *Monthly Labor Review*, June 1948); 1946 data for Milwaukee, Wis.; Scranton, Pa., and Savannah, Ga. (available upon request to the Bureau of Labor Statistics); 1947 data for Washington, D. C.; Manchester, N. H.; and Richmond, Va. (see *Monthly Labor Review*, April, June-August, and October 1949); 1948 data for Denver, Colo.; Detroit, Mich.; and Houston, Tex. (see *Monthly Labor Review*, December 1949); and 1949 data for Memphis, Tenn. (see *Monthly Labor Review*, June 1951). These data from 1946-49, both inclusive, are now also available in Bulletin No. 1065, *Family Income, Expenditures, and Savings in 10 Cities*.

A Nation-wide Consumer Expenditure Survey was made for 1950 by the Bureau of Labor Statistics in 91 cities yielding 12,500 usable schedules from families and single consumers. Data from this survey were not available for inclusion here at the time this section was sent to the printer. For field methods and purposes, see *Monthly Labor Review*, January 1951. For selection of cities for the survey, see *Monthly Labor Review*, April 1951.

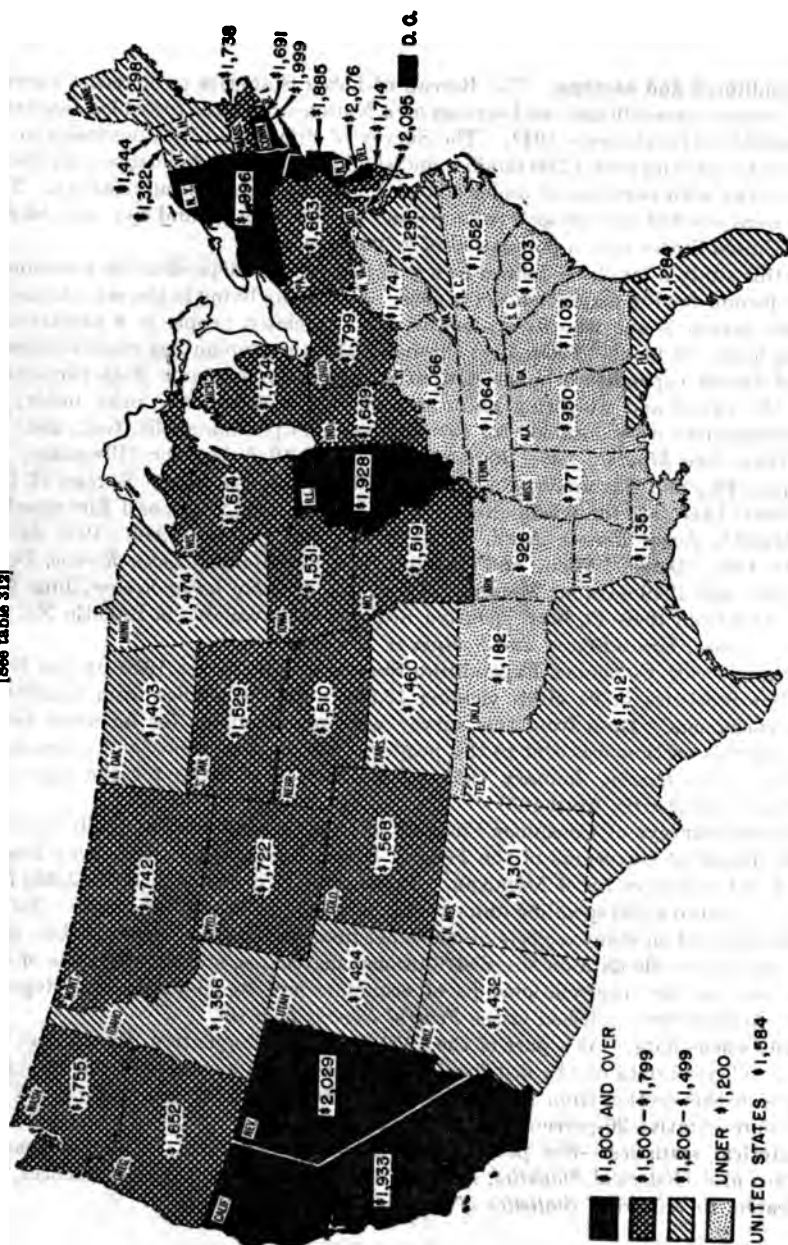

National Surveys of Consumer Finances have been conducted annually since 1946 for the Board of Governors of the Federal Reserve System by the Survey Research Center of the University of Michigan. These samples of about 2,500 to 3,000 family units or 2,800 to 3,500 spending units are taken at 60 to 66 sampling points. Information is obtained on many aspects of consumer finances—income, assets, debts, saving, etc.—which provide data on size distributions, aggregates, and distributions of aggregates, and on the interrelationships of economic and social variables. Reports of survey findings are published in the *Federal Reserve Bulletin*.

1950 Census data.—As a part of the 1950 Census of Population, the Bureau of the Census collected data on the distribution of income from a sample of the population. Figures in this section from the 1950 Census (see table 322) are final figures based on a representative 20-percent sample of the population.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series A 101-116") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 306.—GROSS NATIONAL PRODUCT OR EXPENDITURE IN CONSTANT (1939) DOLLARS: 1929 TO 1952

[In billions of 1939 dollars. Constant-dollar figures obtained by dividing current-dollar estimates shown in table 305 in as fine a product detail as possible, by appropriate price indexes based on 1939 as 100, in order to eliminate from the current-dollar estimates all price change as compared with 1939. For definition of gross national product, see text, p. 273]

No. 312.—INCOME PAYMENTS TO INDIVIDUALS, BY STATES: 1929 TO 1951

["Income payments to individuals" is a measure of income received from all sources during the calendar year by the residents of each State. For six States and the District of Columbia, however, totals shown below are not strictly measures of income received by residents. Totals for District of Columbia, New York, and Maine are too high—and those for Maryland, Virginia, New Jersey, and New Hampshire too low—in terms of measures of total income received by residents. Estimates shown here for D. C. include income paid out to residents of Maryland and Virginia employed in D. C., but exclude income of D. C. residents employed in these 2 States. Estimates for New York include income paid to residents of New Jersey employed in New York, but do not include income of New York residents employed in New Jersey. Similarly, estimates for Maine include income paid to residents of New Hampshire employed in Maine. In computation of per capita income for these 7 States, income totals shown here were first adjusted to a residence basis before division by population. Following are amounts (in millions) of adjustments for 1951: District of Columbia, —592; Maryland, +308; Virginia, +284; New York, —585; New Jersey, +563; Maine, —24; New Hampshire, +24. For definition of income payments to individuals, see text, p. 274.]

¹ Consists of net income of farm proprietors (including value of change in inventories of crops and livestock), arm wages, and net rents to landlords living on farms.

² Consists of pay of State and local and of Federal civilian employees, net pay of armed forces, family-allowance payments to dependents of enlisted military personnel, voluntary allotments of military pay to individuals, mustering-out payments to discharged servicemen, veterans' benefit payments, interest payments to individuals, public assistance and other direct relief, and benefit payments from social insurance funds.

³ Consists of wages and salaries and proprietors' income.

No. 314.—PERCENT DISTRIBUTION OF FAMILY UNITS, INCOME BEFORE TAXES AND LIQUID ASSETS, BY INCOME GROUPS: 1951

[National estimate based on sample interview survey of 2,501 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1952. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps. For liquid asset holdings of individuals and businesses, see table 472, p. 438]

ANNUAL 1951 MONEY INCOME BEFORE TAXES	Family units	Total money income	Liquid assets ¹
All income groups.....	100	100	100
Under \$1,000.....	11	1	6
\$1,000-\$1,999.....	13	4	7
\$2,000-\$2,999.....	16	9	8
\$3,000-\$3,999.....	17	14	12
\$4,000-\$4,999.....	15	16	10
\$5,000-\$7,499.....	17	24	18
\$7,500 and over.....	11	32	39

¹ Liquid assets include all U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions held at time of survey in early 1951. Currency is excluded.

¹ Ranking based on size of money income before or after tax.

² Estimated liability on Federal income tax, excluding tax on capital gains. Tax liability was not obtained directly from interviews or from tax returns, but from comprehensive data on family composition and income obtained in connection with Consumer Finances Surveys. For method of estimating, see *Federal Reserve Bulletin*, Aug. 1950, pp. 961-962.

Source: Board of Governors of the Federal Reserve System. Based on data from 1949, 1950, and 1951 Surveys of Consumer Finances, conducted by Survey Research Center of University of Michigan for Board of Governors.

NO. 316.—AVERAGE INCOME OF EACH TENTH OF NATION'S SPENDING UNITS WHEN RANKED BY SIZE OF INCOME, 1946-51 WITH PERCENTAGE INCREASE SINCE 1946

[See headnote, table 317]

SPENDING UNITS RANKED BY SIZE OF INCOME	AVERAGE MONEY INCOME BEFORE TAXES ¹						PERCENT INCREASE SINCE 1946

¹ Average (mean) income has been computed for each income tenth (decile) as well as for whole population. Sampling error, which was approximately \$180 for whole population, is not yet available for individual tenths. It will be much larger than \$180 for the highest tenth and much smaller for the middle tenths.

² Negative incomes caused by farm or business losses included in upper line and excluded in lower line.

³ Not available.

NO. 317.—MEAN AND MEDIAN INCOMES WITHIN OCCUPATIONAL GROUPS: 1946 TO 1951

[Data based on approximately 2,900 to 3,500 interviews taken in 60 sampling areas throughout country. Interview unit defined as all persons living in the same dwelling and belonging to the same family who pool their incomes to meet their major expenses. Mean income is the average obtained by dividing aggregate money income before taxes by number of spending units. Median income is that of middle spending unit when units are ranked by size of money income before taxes]

No. 818.—PERCENT DISTRIBUTION OF SPENDING UNITS HAVING SPECIFIED CHARACTERISTICS, BY AMOUNT OF NET WORTH, EARLY 1950

[Net worth is defined as difference between total selected assets and total debt reported in interviews during January-March 1950. Selected assets include liquid assets (U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions), owner-occupied homes and farms, other real estate, farm machinery, crops and livestock, automobiles, interests in unincorporated nonfarm businesses and privately held corporations, and common and preferred stock in corporations open to investment by the general public. Liabilities include all forms of debt other than charge accounts. For method of computing net worth, see *Federal Reserve Bulletin*, December 1950, pp. 1610-1611. Net worth figures should be considered as minimum estimates because of omission of assets such as currency, corporate bonds, reserve value of life insurance policies, consumer durable goods other than automobiles, jewelry, etc., and because of under-reporting of assets covered]

CHARACTERISTIC OF SPENDING UNIT	ALL CASES		AMOUNT OF NET WORTH					
	Number	Percent	Negative	\$1-\$999	\$1,000-\$4,999	\$5,000-\$24,999	\$25,000 and over	Not ascertained

¹ Current dollars divided by consumers' price index on base 1948=100 to give a rough measure of changes in purchasing power of income.

Sources: 1935-36, National Resources Planning Board; 1941, Department of Labor; 1944, National Bureau of Economic Research; and 1948, Council of Economic Advisers. Published in *Economic Report of the President*, January 1950 and July 1951.

No. 320.—INCOME SHARES OF UPPER AND LOWER GROUPS OF TOTAL POPULATION: 1919 TO 1948

[Data are based on comparisons between Federal tax data and countrywide totals of income receipts by individuals. Individuals' incomes underlying the basic and economic income variants are defined as receipts for the participation of individuals or of their property in the production process; include employee compensation and other payments to labor, entrepreneurial income, rent, interest, dividends; exclude capital gains and other transfers and do not allow deductions except of business expenses. The basic variant is a first approximation to shares in income thus defined. The economic income variant represents an adjustment of the basic variant to take account of some items omitted from the tax data (compensation of nonfederal government employees and imputed rent on owner-occupied houses), to allow for a finer division of tax returns by distinguishing between head of family and nonhead returns, and to allow for the effect of classifying returns by net income, as defined for tax purposes, instead of by economic income. The disposable income variant measures shares in individuals' incomes after deducting Federal income taxes and including gains and losses from sales of assets. See also *Historical Statistics*, series A 195-197]

¹ Family size based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

² Earner defined as a family member that worked for pay (as wage or salary worker or on his own account) at any time during year.

³ Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining amounts shown for both items. Inheritances and large gifts are not considered current income; inheritances and gift taxes excluded from personal taxes.

⁴ Includes expenditures for alcoholic beverages.

⁵ Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

⁶ Value of bonds purchased less those cashed.

⁷ Represents differences between income and expenditures plus net war bond purchases and insurance premium payments. Includes amounts deducted for social security, retirement plans, etc., not available separately.

No. 322.—NUMBER OF FAMILIES AND UNRELATED INDIVIDUALS BY INCOME LEVEL IN 1949, AND MEDIAN INCOME, BY STATES: 1950

[Based on 20-percent sample of 1950 Census returns. "Family" refers to a group of two or more related persons residing in same household. "Unrelated individual" refers to a person living alone or with persons not related to him. See source for explanation of sampling variability. Medians computed from \$500 intervals]

No. 325.—PERCENT DISTRIBUTION OF PRIMARY FAMILIES AND UNRELATED INDIVIDUALS WITH WAGE OR SALARY INCOME, BY WAGE OR SALARY INCOME AND RECEIPT OF NONWAGE INCOME, URBAN AND RURAL: 1939 TO 1951

[Based on samples of population residing in households only; see sources for evaluation of sampling variability. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Primary family" refers to head of household and all persons related to him. A "primary individual" refers to household head who has no relatives living with him. These terms were not used in 1940 Census. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, Armed Forces pay, etc., as well as receipts commonly referred to as wages or salaries. It excludes value of income in kind, such as living quarters, meals, clothing, etc. A primary family was considered to have other income if any person 14 years of age and over in family had \$40 or more of income from sources other than money wages or salaries. For explanation of urban and rural areas, see p. 2]

No. 333.—INCOME OF NONSALARIED PHYSICIANS, LAWYERS, AND DENTISTS: 1929 TO 1951

Data are based on mail questionnaire surveys of the three professions, usually in cooperation with the professional associations. At intervals, large-scale surveys have been conducted to establish benchmark data, most recently in 1948 (lawyers), 1949 (dentists), and 1950 (physicians). For later years, smaller, interim surveys are conducted to obtain indexes for extending the benchmark data forward]

12. Prices

The indexes issued by the Bureau of Labor Statistics have been, since the beginning of the century, the major source of price statistics in summarized form. This agency prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 22 commodities; indexes of food prices at retail in 56 large cities; and indexes of consumers' prices for moderate-income families in 34 large cities.

Wholesale price index.—Since 1902, the official monthly wholesale price index has been prepared as an indicator of general price trends and average changes in commodity prices at primary market levels. The official series on the base, 1926=100, has been carried back to 1890; separate monthly indexes are available for major groups of commodities from January 1890, and for subgroups of commodities beginning with 1913. This index, based on 1926=100, is the official index for December 1951 and all earlier dates.

A newly-revised index, based on 1947-49=100, is now the official index for January 1952 and all subsequent months. Weights used represent all sales at the primary market level during the calendar year 1947. Moreover, the new index has expanded the number of commodities covered to 2,000 instead of the 900 measured by the earlier index. For a detailed description of the new index, see the *Monthly Labor Review*, February 1952.

The index measures average changes in commodity prices of commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. Wherever feasible the prices are f. o. b. point of production or sale. In the case of some commodities, prices quoted in organized commodity markets are used.

The index measures completely the price changes of only the commodities which are specifically defined for pricing both physically and in terms of market structure. It is not an over-all measure of the "general price level" or of "the purchasing power of the dollar"—it does not include all classes of commodities (real estate, securities, services, etc.) which are factors in the "general price level."

Consumers' price index.—This index measures average changes in retail prices of goods, rents and services, purchased by wage-earners and lower-salaried clerical workers in large cities. The weights used in calculating the index are based on studies of actual expenditures by families of wage-earners and lower-salaried workers. A study conducted in 1917-19 provided the weights used from 1913 to 1935. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934-36 average expenditures of urban families whose annual incomes averaged \$1,524 in 1934-36. Weights used beginning January 1950 have been adjusted to 1949-50 spending patterns.

The index does not measure changes in the total amount families spend for living or relative differences in prices or living costs between cities. The list of items priced for the index includes approximately 225 goods and services. For many goods a number of different articles or qualities of articles are included in the index. Sales taxes are reflected wherever applicable, but income taxes, social security deductions, and bond deductions are not included. Since March 1943, food indexes have been based upon changes in food prices in 56 cities. From September 1940 through June 1947, consumers' price indexes were computed monthly for 21 cities, and in March,

Note.—This section presents data for the most recent year or period available on March 17, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

June, September, and December for 13 additional cities; beginning July 1947, indexes have been computed monthly for 10 cities, and once every 3 months for 24 additional cities according to a staggered schedule. Since July 1947, the following schedule has been in effect:

- Food prices and indexes for 56 cities each month;
- Fuel prices and indexes for 34 cities each month;
- Commodities (other than food and fuel) and services indexes for 10 cities monthly and for 24 additional cities quarterly on a rotating cycle;
- Rents quarterly for 34 cities, on a rotating cycle;
- All items and group indexes for 10 cities monthly, and for 24 additional cities quarterly on a rotating cycle;
- National indexes (average of large cities) for all items and groups, monthly, based upon prices in the cities surveyed and estimated changes in the unpriced cities.

The retail food price indexes presented in this section are one component of the consumers' price index. For periods from January 1935 to March 1943 they are based on the distribution of expenditures as shown by the 1934-36 study of expenditures of wage-earners' and lower-salaried clerical workers' families. In March 1943, the weights for this index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950, the weights were adjusted to estimated 1949-50 spending patterns. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, and 60 foods thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923-25 base.

Other indexes.—The Bureau of Agricultural Economics prepares currently indexes of prices received for farm products and of prices paid by farmers. (See text, p. 605.)

In comparing the movement of the indexes of consumers' prices and of the prices paid by farmers for commodities bought for family living (table 726), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series L 41-47") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

FIG. XXIII.—WHOLESALE PRICE INDEXES: 1926 TO 1952

[1947-49=100. Prices in primary markets. See table 334]

FIG. XXIV.—CONSUMERS' PRICE INDEX: 1913 TO 1952

[1935-39=100. See table 339]

*Estimates of World War II and Postwar understatement by the index were not included. See *Monthly Labor Review* for March 1947.

No. 334.—WHOLESALE PRICE INDEXES FOR ALL COMMODITIES, AND FOR ALL COMMODITIES OTHER THAN FARM PRODUCTS AND FOODS: 1926 TO 1952

[1947-49-100. This index is the official price index, beginning with January 1952. Although the new index has been computed back to 1926, for comparison, the official index for December 1951 and all earlier dates is that based on 1926-100, shown in tables 325 and 326 of the 1952 Abstract]

YEAR	Yearly average	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

No. 339.—CONSUMERS' PRICE INDEX FOR MODERATE-INCOME FAMILIES IN LARGE CITIES: 1913 TO 1952

[1935-39-100. For detailed explanation, see general note, p. 300. The Consumers' Price Index has been adjusted to incorporate a correction of new unit bias in rent index beginning with indexes for 1940 and adjusted population and commodity weights beginning with indexes for January 1950. These adjustments make a continuous comparable series. See also *Historical Statistics*, series L 41-47]

YEAR AND MONTH	All Items	Food	Apparel	Rent	FUEL, ELECTRICITY, AND REFRIGERATION				House-furnishings	Miscellaneous ¹

¹ Average of four quarterly indexes.

² Weighted average of two quarterly indexes and six monthly indexes.

³ 12-month average. Beginning March 1950: Price movements in 10 key cities measured monthly; for other cities (surveyed quarterly on a staggered schedule), preceding surveyed index used for each nonsurveyed month.

⁴ Not available.

⁵ Discontinued.

* St. Paul combined with Minneapolis.

No. 350.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED: 1925 TO 1951

[Values required by law to represent values in foreign markets whence exported to United States. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Averages obtained by dividing total value of imports of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

13. Elections

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues, is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Almost all of the more than 120 thousand governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for the multitude of candidates, except for Federal offices, and in most States, for State offices. Few States require central reporting on local elections. The numbers of governments holding elections and the numbers of voters participating vary between Presidential and the intervening Congressional election years, and between even-numbered and odd-numbered years.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each Presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912 it has remained constant. The 14th Amendment to the Constitution, in effect at the present time, provides that "Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State . . ." The Constitution also requires that each State have at least one Representative.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 27-31") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on March 31, 1953, when the material was organized and sent to the printer.

1952	61,551,978	33,824,351	27,314,987	47,655	292,217	72,768	—	55.0	44.4

¹ Totals for years prior to 1928 exclude votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928-44 exclude void and blank ballots.

² For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912, Progressive; 1916 to 1932, miscellaneous. ³ Democrat-Populist.

⁴ Socialist-Labor only. In 1924 practically all Socialist votes cast for La Follette and Wheeler, official candidates of both Socialist and Independent Progressive parties, included in miscellaneous.

⁵ Includes scattering votes; 445 in Iowa; 633 in New Jersey; and 131 in Pennsylvania. ⁶ Workers.

⁷ Included with miscellaneous are 798 Union votes cast in endorsement of Republican candidate.

⁸ Included with miscellaneous are 417,418 American Labor votes cast in endorsement of Democratic candidate.

⁹ Included with miscellaneous are 496,405 American Labor and 329,235 Liberal votes cast in endorsement of Democratic candidate.

¹⁰ Included with miscellaneous are 1,169,021 votes for Thurmond (States' Rights Democrats) and 1,156,103 votes cast for Wallace (Progressives, etc.); included with Democratic are 222,562 Liberal votes cast for Democratic nominees.

¹¹ Included with Democratic are 416,711 Liberal Party votes.

No. 358.—APPORTIONMENT OF CONGRESSIONAL REPRESENTATION, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1950

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 6 below)]

¹ Number of Representatives not to exceed 1 for each 30,000 inhabitants.

² See headnote.

³ Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See note 6.

⁴ Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See note 6.

⁵ Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.

⁶ Assigned after apportionment.

⁷ Included in apportionment act in anticipation of Statehood.

⁸ Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 358.—VOTE FOR UNITED STATES REPRESENTATIVES, BY MAJOR POLITICAL PARTIES, BY STATES: 1950 AND 1952

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In New Mexico and North Dakota, no representatives were elected from districts, but more than one was elected from the State at large; in these States, each party total represents votes cast for that candidate of the party receiving highest vote. In Delaware, Nevada, Vermont, and Wyoming only one representative is elected at large. In Connecticut, Ohio (1950), Texas (1952), and Washington (1952), representatives are elected by district except one, who is elected at large; the at-large vote is not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are here counted as for the endorsing party. See also notes below]

¹ In California a person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

² Less than 500.

³ Includes 87,673 blanks.

⁴ Democratic-Farmer-Labor party.

⁵ Voters entitled to vote for 2 candidates; total ascertained by adding the vote of the highest candidate in each party.

⁶ Included in Republican are 40,575 endorsing votes cast for Democrats; included in "Other" are 164,605 endorsing votes cast for Democrats and 25,355 for Republicans.

¹ Excludes those reporting no expenditure.² Reported as spent "in connection with legislative interests." Some groups report expenditures for all purposes; others report an allocation of spending for legislative purposes.Source: Congressional Quarterly News Features, Washington, D. C.; *Congressional Quarterly Almanac*. (Material copyrighted; written permission required for reproduction rights.)

14. Federal Government Finances and Employment

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for budget appropriations and other authorizations for the maintenance of the various departments and establishments. It includes estimates to carry out both existing laws and proposed legislation. Data from *The Budget of the United States Government* for the fiscal year ending June 30, 1954, are presented in tables 368-373. The Treasury Department publishes a *Digest of Appropriations* each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books relating to all of the receipt accounts and appropriation accounts which report disbursements under the appropriations made by the Congress.

The day-to-day financial operations of the Federal Government are reported in the *Daily Statement of the United States Treasury*, which covers all of the receipts and expenditures of the Government, including those arising under public debt operations. The *Daily Treasury Statement* for the first working day of each month contains a statement of the public debt as of the last day of the month just ended. The *Daily Treasury Statement* of the fifteenth of the month contains certain special tables. The *Treasury Bulletin*, a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains reports on the finances of the Federal Government and developments in Treasury operations. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are presented in the Treasury Department's *Circulation Statement of United States Money* (monthly) and *Prices and Yields of Public Marketable Securities* . . . (monthly).

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department. This Bureau's annual report, *Statistics of Income*, Part 1, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income*, Part 2, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. See tables 379-392, 536, 538, 539, and 546.

Data from a special study on debt by the Office of Business Economics of the Department of Commerce are presented in table 394. These data are published annually in the *Survey of Current Business*. Gross debt, as defined in this study, consists of all classes of legal indebtedness except the following: (1) Deposit liability of banks and the amount of bank notes in circulation; (2) value of outstanding policies and annuities of life insurance carriers; (3) short-term debts among individuals and unincorporated nonfinancial business firms; and (4) nominal debt of corporations, such as bonds which are authorized but unissued or outstanding but reacquired.

Note.—This section presents data for the most recent year or period available on March 31, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

Federal employment figures are compiled primarily by the Civil Service Commission. The figures are issued by that agency in its regular *Annual Report* and in its *Monthly Report on Employment*. The Commission also publishes an annual report on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service*. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

TREASURY FUND STRUCTURE

All receipts of the Government, with a few exceptions, are deposited to the credit of the general fund of the Treasury irrespective of their ultimate disposition or availability for expenditure. However, these receipts are recorded by the Treasury in accounts classified generally according to the source, and according to whether or not the receipts are earmarked in some degree for expenditure.

Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress. All disbursements of the Government, with a few exceptions, are made from the general fund irrespective of the source of funds or authority for such disbursements. These disbursements are further classified by accounts reflecting various types of authorizations or conditions under which they may be expended. A brief description of these various classes of accounts follows:

Budget accounts.—General receipt accounts are a record of receipts which are available to finance the general operations of the Government to the extent appropriations are made by the Congress. If expenditures out of these appropriations exceed budget receipts, the Secretary of the Treasury is authorized to borrow on the credit of the United States. The principal sources of general receipts are income taxes, excise taxes, employment taxes, customs duties, and miscellaneous receipts.

Special receipt accounts (earmarked moneys) are funds received generally under Federal projects pursuant to special authorizations of law, which may be expended only for the particular purpose specified and not for general purposes. The Congress appropriates these receipts for the special purpose involved. Examples of some of the special fund receipts relate to the Reclamation Fund, Alaska Railroad Fund, the Mineral Leasing Act, and the National Forest Funds.

Expenditure (appropriation) accounts record the amounts authorized by the Congress, and expenditures therefrom, for the general support of the Government. They are classified according to the period of availability (i. e., 1-year, multiple year, no-year), as to amount (definite or indefinite), or whether or not requiring annual appropriation action by the Congress.

Revolving and management fund accounts are funds authorized by specific provisions of law to: (a) Finance a continuing cycle of operations with receipts derived from such operations available without further action by Congress; or, (b) facilitate accounting for and administration of intragovernmental operations. Examples of such accounts are the General Supply Fund of the General Services Administration;

the Working Capital Fund of the Public Buildings Administration; and corporate operations such as those under the Reconstruction Finance Corporation and the Commodity Credit Corporation.

Nonbudget accounts.—Trust accounts are receipts and expenditures (appropriation) accounts maintained to record the receipt and expenditure of moneys held in trust by the Government for the benefit of individuals, or classes of individuals, which may be expended only in accordance with the terms of a trust agreement or statute. Examples are the Civil Service Retirement Fund, Federal Old-Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, and National Service Life Insurance Fund. These moneys are not available for general purposes and do not enter into the budget surplus or deficit.

Deposit fund accounts are receipts that are either: (a) Held in suspense temporarily and later refunded or transferred into some other account of the Government; or, (b) held by the Government as banker or agent for others and paid out at the direction of the owners. These funds have no effect on the budget surplus or deficit. In Treasury reports these accounts are reported on a net basis (excess of expenditures or excess of receipts for the period). Examples are employees' payroll allotment accounts for the purchase of U. S. savings bonds, and accounts for the accumulation of taxes withheld from employees' salaries.

BASIS OF TABLES

Many tables dealing with Federal fiscal affairs are based upon, or reconciled with, financial data as reported in the *Daily Treasury Statement*. This *Statement* is compiled from the latest available reports received from Government depositaries and disbursing offices.

Expenditures (disbursement basis).—Expenditures of the Government are stated by the Treasury Department in its published reports on two bases:

1. In the *Daily Treasury Statement*, expenditures are reported to quite an extent upon the basis of checks issued as furnished daily by teletype from Government disbursing offices; the main exception is the Department of Defense, the figures of which are currently on a checks-paid basis. Also included as expenditures are transfers from general appropriation accounts to trust funds.

2. In the annual *Combined Statement of Receipts, Expenditures and Balances* expenditures are stated on the basis of checks-issued during the fiscal year, as reported by Government disbursing offices; the Treasury holds its books open for this purpose until all such reports have been received.

Receipts.—Similarly, the Treasury Department utilizes three bases for the reporting of receipts:

1. In order to state receipts of the Government as promptly as possible, revenues and miscellaneous receipts are reported in the *Daily Treasury Statement* on the basis of the latest available reports of deposits in Government depositaries.

2. However, certificates of deposit covering actual deposits in Treasury offices and depositaries cannot reach the Treasury immediately and for that reason all receipts for a fiscal year cannot be covered by warrants (formally documented) immediately upon the close of each fiscal year. In the *Combined Statement of Receipts, Expenditures and Balances* receipts are compiled on a warrants-issued basis and include in-transit items in such a manner as to take into account all certificates of deposit applying to a particular fiscal year.

3. Collection basis—Statements showing receipts on this basis are compiled from reports of collectors in the field and from depositaries for withheld taxes. These reports do not coincide with others because collecting officers make collections during the last few days of the fiscal year which are not deposited until after the close of the fiscal year and because many employers deposit withheld taxes directly in depository

banks. The depositary receipts are later submitted to collectors who report them in addition to the cash payments they have received. The moneys represented by the depositary receipts have been reported in the *Daily Treasury Statement* sometimes several months before it is possible to report them as collections. This reporting basis has the advantage of providing statistical details which are not available elsewhere.

Public debt accounts.—Tables on this basis indicate the status of the public debt after taking into consideration items in transit at the end of the period. The basis differs from that used in the *Daily Treasury Statement* since the Treasury believes that it is not practical to delay publication of that report in order to include all transactions for a particular day.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 89-98") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

¹ Net receipts equal total receipts less (a) appropriations to Federal old-age and survivors insurance trust fund beginning 1937 and (b) refunds of receipts beginning 1931.

² Figures adjusted beginning 1931 on account of refunds of receipts and capital transfers.

³ Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in other receipts.

⁴ On basis of warrants issued 1789 through 1930; thereafter, on basis of checks issued.

⁵ Average for period Mar. 4, 1789, through Dec. 31, 1800.

⁶ Averages are for entire period though there were no amounts under these items for certain years.

⁷ Years ending Dec. 31, 1801 to 1842; average for 1841-50 is for period Jan. 1, 1841, through June 30, 1850.

⁸ Average for 1863-65.

⁹ Less than \$500.

¹⁰ Average for 1881 and 1884.

¹¹ One year only, 1895.

¹² One year only, 1910.

¹³ Sales of public lands included in other receipts.

1952	66,145,247	30,419,425	10,231,265	(¹)	(¹)	5,859,263	19,935,294	259,105	1,650.19

¹ Excludes debt retirements and beginning 1931, refunds of receipts and capital transfers.

² Excludes civil expenditures under War and Navy Depts. in Washington through 1915. Subsequent to 1915 includes all expenditures made by Depts. of Army (including rivers and harbors and Panama Canal), Navy, and, beginning 1949, Air Force, irrespective of original sources of funds. Expenditures of Dept. of Air Force for 1949 were \$1,600,461,000, for 1950, \$3,520,633,000, for 1951, \$6,358,604,000, and for 1952, \$12,851,619,000.

³ On basis of warrants issued through 1930; thereafter, on basis of checks issued. Expenditures for Indians exclude interest accounts, which are included in trust fund expenditures beginning 1940. Veterans' pensions represent expenditures under appropriation "Army and Navy pensions," administered by Veterans' Administration.

⁴ Includes civil expenditures under War and Navy Depts. in Washington through 1915, expenditures of Office of Secy. of Defense, unavailable funds charged off under Act of June 3, 1922, expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932, and expenditures for Indians and veterans' pensions beginning 1949.

⁵ Represents gross debt as of end of each period; e. g., 1800, 1810, etc.

⁶ Years ending Dec. 31 through 1842; average for 1789-1800 begins Mar. 4, 1789; average for 1841-50 is for Jan. 1, 1841-June 30, 1850. See note 5 concerning gross debt. ⁷ Included in all other.

⁸ For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,000,000,000) have been consolidated with budget expenditures.

⁹ Beginning 1951, investments of wholly owned Government corporations in public debt securities are excluded from budget expenditures.

¹⁰ Includes \$21,385,000 for Department of Defense, not segregated as to respective departments.

No. 368.—FEDERAL GOVERNMENT EXPENDITURES BY ORGANIZATION UNIT: 1945 to 1952

[In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis, adjusted in total to daily Treasury statement basis (which is partly checks issued and partly checks paid). "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Two important exceptions are appropriations from general fund to Federal old-age and survivors trust fund and refunds of receipts, both of which are excluded from expenditures and deducted from receipts. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included; see also table 371). Figures in early years have not been revised to reflect recent changes in organizational structure.]

¹ Excludes transfer of \$3 billion of 1948 surplus to foreign economic cooperation trust fund for expenditure in 1949.

² Excludes \$11,036,000 representing net purchases of United States securities which is included in Treasury totals (see table 367).

³ Other expenditures are shown under various agencies to which funds are allocated.

⁴ Less than \$500,000.

⁵ Deduct.

⁶ Included with Department of Commerce.

⁷ Includes transactions of mixed-ownership corporations of \$365,696,000 (net) which are shown separately in the Daily Treasury Statement.

⁸ Since 1950, sales and redemptions of obligations of wholly-owned Government corporations have been excluded from this table.

Source: Bureau of the Budget; *Budget of the United States Government*.

No. 369.—RECEIPTS FROM AND PAYMENTS TO THE PUBLIC BY THE FEDERAL GOVERNMENT: 1929 TO 1952

In billions. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust accounts as well as budget accounts of Federal Government. This table therefore shows flow of money on cash basis between Federal Government as a whole and the public. Net borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government corporations, and also excludes certain types of public debt transactions like issuance and redemption of armed forces leave bonds. The public is defined to include individuals; banks (including Federal Reserve and Postal Savings System); businesses; private corporations; State, local and foreign governments; and international organizations. For additional explanation, see 1954 *Budget*, pp. 1076-77, headnote to table 368, and general note, p. 333.]

S. Government, 1954.*

No. 371.—BUDGET APPROPRIATIONS AND OTHER AUTHORIZATIONS FOR FEDERAL AGENCIES, BY ORGANIZATION UNIT: 1952

[In millions of dollars. For year ending June 30. The Budget total of "new obligational authority" represents total of new authorizations enacted for any fiscal year for Federal agencies to incur obligations. This total includes "net new appropriations," "reappropriations," "contract authorizations," and "authorizations to expend from public debt receipts." "Net new appropriations" represent total of all appropriations less appropriations enacted to liquidate prior year contract authorizations. "Reappropriations" continue available in the succeeding fiscal year the unused balance of an appropriation which would otherwise expire for obligation purposes. "Contract authorizations" permit placement of specific obligations or contracts but require subsequent appropriations to "liquidate" them (i. e., to authorize withdrawal of funds from Treasury in payment of obligations). "Authorizations to expend from public debt receipts" authorize use of proceeds of Treasury borrowing to finance certain types of Government programs. See also general note, p. 333, and headnote to table 368]

¹ Includes defense tax.

² Tax liabilities for 1942 and 1943 unadjusted for transition to current payment basis.

³ Includes net Victory tax. Computed by assuming that deductions are 10 percent of Victory tax net income; i. e., that Victory tax net income is ten-ninths of selected net income.

⁴ Individual Income Tax Act of 1944.

⁵ Taking into account maximum effective rate limitation of 77 percent. ⁶ Split income basis.

No. 379.—INDIVIDUAL AND TAXABLE FIDUCIARY INCOME TAX RETURNS—SUMMARY: 1925 to 1950

Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, the filing requirements applicable to individuals (citizens or residents of the United States), for the years shown, are as follows: (1) Single, or married and not living with husband or wife: for 1925 and 1930, net income of \$1,500 or over; 1935, \$1,000 or over; 1940, gross income of \$800 or over; (2) Married and living with husband or wife: for 1925 and 1930, combined net income of \$3,500 or over; 1935, \$2,500 or over; for 1940, combined gross income of \$2,000 or over; (3) For 1945, every individual with gross income of \$500 or over; and for 1948-50, \$500 or over; for refund purposes, returns are also required with respect to gross incomes under \$500 for 1945, or under \$400 for 1948-50, from which taxes have been withheld. (For 1925-35, returns are required to be filed by individuals having gross income of \$5,000 or over if single, or married and not living with husband or wife; or having combined gross income of \$5,000 or over if married and living with husband or wife; regardless of net income.) *Data for returns showing no net income or no adjusted gross income, filed in accordance with these provisions, are not included in statistics given here.* Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien and, beginning 1938, for every trust having net income of \$100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144-147.

¹ Taxable fiduciary returns included with individual returns through 1940, shown separately thereafter.

² *Net income (shown for 1940 and prior years)* is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. *Adjusted gross income (shown for 1945-50)* is defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property.

³ Tax tabulated for 1940 and prior years is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while tax for 1945-50 is after deduction of such credits.

⁴ Includes defense tax.

⁵ For individual returns only, 1945 and later years.

Number of returns (thousands).....							

¹ See note 2, table 379.

² Salaries, wages, commissions, etc., include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but exclude wages of not more than \$100 per return from which no tax is withheld, reported on Form W-2 for 1946-47, and on Form 1040A for 1948-50. (See note 12.)

³ Dividends received exclude amounts received through partnerships and fiduciaries; exclude amounts not exceeding \$100 per return reported on Form W-2 for 1946-47 and on Form 1040A for 1948-50. (See note 12.)

⁴ Interest received includes interest on notes, mortgages, bank deposits, corporation bonds before amortization of bond premium, and taxable and partially tax-exempt interest on Government obligations before amortization of bond premium; also includes, when received through partnerships and fiduciaries, partially tax-exempt interest on Government obligations and partially tax-exempt dividends on share accounts in Federal savings and loan associations. Excludes amounts not exceeding \$100 per return reported on Form W-2 for 1946-47 and on Form 1040A for 1948-50. (See note 12.)

⁵ Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts.

⁶ Net profit from business is excess of gross receipts over business expenses and net operating loss deduction due to net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and net operating loss deduction over gross receipts from business.

⁷ Partnership profit or loss excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.

⁸ Capital assets consist of all property held by taxpayer other than (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 9. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and net capital loss carry-over from five preceding years but not prior to 1942. Allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxed under Supplement T) computed without regard to gains and losses from sales of capital assets, or to \$1,000, whichever is smallest. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see *Statistics of Income*, Part 1.

⁹ Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, (2) Government obligations issued on or after Mar. 1, 1941, on a discount basis and payable, without interest, within 1 year from issue, and (3) real property used in trade or business.

¹⁰ Income shown from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. Annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

¹¹ Income from estates and trusts excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

¹² Miscellaneous income includes all taxable income not accounted for elsewhere in this table; also includes wages not subject to withholding, dividends, and interest, not exceeding in total \$100 per return reported on Form W-2 for 1946-47 and on Form 1040A for 1948-50.

¹ Preliminary.

² An unequal number of returns of husbands and wives results from use of sampling in certain income areas, from the fact that some returns lack sufficient information to identify the family relationship, and from deferment of filing returns by members of the armed forces for 1945 and 1946.

³ Included in "Separate returns of husbands and wives."

⁴ See note 2, table 379.

No. 386.—CORPORATION INCOME TAX RETURNS—SUMMARY: 1925 TO 1950

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. For other corporation data based on income tax returns, see pp. 480-482 and 486. See also *Historical Statistics*, series P 152-164.]

(Money figures in millions of dollars)

Adjusted excess profits net income.....				912	8,368			8,976

¹ Preliminary.

² Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

³ Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-50, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 638, p. 481.) Beginning 1936, dividends received on stock of domestic corporations are included in taxable income. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

⁴ Includes defense tax.

⁵ Number of returns with no net income, for 1925, includes returns of inactive corporations, not available separately.

⁶ For tax reported, see above.Source: Treasury Department, Bureau of Internal Revenue; *Statistics of Income*, Part 2.

A corporation is classified industrially according to the business reported on the return. When diversified activities are reported, the classification is determined by the industry which accounts for the largest percentage of all receipts.

For changes in classification affecting comparability of data, see "Statistics of Income for 1938, Part 2."
Less than \$500,000.

¹ A return is required of every citizen or resident alien who transferred by gift during calendar year to any one donee property exceeding \$3,000 in value or who, regardless of value, made a gift of future interest in property. A nonresident alien is similarly required to file a return if gift consists of property situated in the United States.

² The Revenue Act of 1948 provides that gifts of husband or wife to third party after Apr. 2, 1948, may be considered made one-half by each.

³ An exclusion is allowed of the first \$3,000 of gifts, except gifts of future interest in property, made to any one donee during calendar year.

⁴ Deduction allowed citizens or residents for gifts made after Apr. 2, 1948, to the donor's spouse.

⁵ The specific exemption of \$30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

No. 391.—FEDERAL ESTATE TAX RETURNS—SUMMARY: 1935 TO 1949

[All money figures in thousands of dollars. An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m., June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds \$50,000; (b) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds \$100,000; (c) in period Aug. 31, 1935 through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (d) on or after Oct. 22, 1942, the value of whose gross estate exceeds \$60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax]

¹ Net taxable estate is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940 through Sept. 20, 1941.

² Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

³ Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

⁴ No data compiled for 1946.

¹ Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 2.)² The specific exemption tabulated (a) for estates subject to additional tax is \$50,000 under 1942 and 1948 acts; \$40,000 under 1941, 1940, and 1935 acts; \$50,000 under 1934 and 1932 acts; and (b) for estates subject to earlier acts is \$100,000 under 1926 act; and \$50,000 under 1924 and prior acts.³ Represents excess of total amount of funeral and administration expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.⁴ Excess of gross estate over allowable deductions, exclusive of specific exemption.⁵ Net estate after deducting specific exemption of \$100,000, except for returns filed under 1924 or prior acts for which specific exemption is \$50,000.⁶ Applies only to estates of individuals who died subsequent to June 6, 1932.⁷ Credits for (a) estate, inheritance, legacy, or succession taxes paid to States, etc.; (b) gift taxes paid to the Federal Government; and (c) death duties paid to foreign countries with which conventions are in effect.Source: Treasury Department, Bureau of Internal Revenue; *Statistics of Income*, Part 1.

¹ Figures for 1800-1840 as of Jan. 1.

² Based on Bureau of Census estimated population for continental U. S. as of July 1 of each year beginning 1880.

³ Excludes bonds issued to Pacific railways and Navy pension fund.

⁴ Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

⁵ Less than \$500,000.

⁶ Bank eligible bonds and beginning 1942 also includes bank restricted bonds.

⁷ Consists of postal savings and Panama Canal bonds, and also conversion bonds prior to 1947.

⁸ Consists of depositary bonds, and adjusted service bonds until they matured on June 15, 1945. Also includes armed forces leave bonds for 1947-51.

¹ Holdings of commercial banks and mutual savings banks for 1925 to 1935 are reported book values, and holdings of residual investors therefore deviate from par values in these years. U. S. savings bonds, Series A-F and J, included at current redemption value.

² Includes all securities issued or guaranteed by U. S. Government, but excludes guaranteed securities held by the Treasury.

³ Includes Postal Savings System.

⁴ Consists of commercial banks, trust companies, and stock savings banks in United States and in Territories and insular possessions. Figures exclude securities held in trust departments.

⁵ Not available separately. Combined totals of these items as follows: 1925, \$13,874,000,000; 1930, \$9,097,000,000; and 1935, \$11,511,000,000.

⁶ Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.

⁷ Includes partnerships and personal trust accounts.

⁸ Includes savings and loan associations, dealers and brokers, foreign accounts, corporate pension funds, and nonprofit institutions.

¹ Includes partnerships, personal trust accounts. ² Exclusive of banks and insurance companies.

³ Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.

⁴ Includes savings and loan associations, nonprofit associations, corporate pension trust funds, dealers and brokers, and investments of foreign balances and international accounts in this country.

⁵ Data on *Daily Treasury Statement* basis. Since data exclude noninterest-bearing debt, they differ slightly from those in table 396. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by Treasury.

⁶ Includes Federal land bank bonds only through June 30, 1946; on June 27, 1947, the U. S. proprietary interest in these bonds ended. Excludes stocks and interagency loans.

⁷ Less than \$50 million. ⁸ Excludes obligations of the Philippine Islands after June 30, 1946.

Source: Treasury Department, *Annual Report of the Secretary*.

NO. 398.—INTEREST-BEARING SECURITIES ISSUED BY ALL GOVERNMENTAL UNITS IN THE UNITED STATES—ESTIMATED AMOUNTS OUTSTANDING, BY TAX STATUS AND ISSUER: 1913 TO 1952

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of *Daily Treasury Statement*. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of these issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers, with no allowance for any other public assets. For exception to par value, see table 397]

(Par value. In millions of dollars)

JUNE 30—	Total	TAX STATUS				ISSUER

No. 400.—U. S. SAVINGS BONDS—SALES AND REDEMPTIONS BY SERIES, CUMULATIVE THROUGH DECEMBER 31, 1952

[In millions of dollars. On basis of *Daily Treasury Statement*. Series A-F and J sales at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K shown at face value. Matured bonds redeemed included in redemptions. Series A-D sold from March 1935 through April 1941 and Series E, F, and G sold since May 1941. Beginning May 1, 1952, rate of interest accrual on Series E increased and Series F and G replaced by two new issues, Series J and K, also at higher interest rates. A new current-income bond, Series H, similar in interest return to Series E, sold since June 1, 1952]

SERIES	Sales	Accrued discount	Sales plus accrued discount	Redemptions	AMOUNT OUTSTANDING		Percent of redemptions to sales plus accrued discount
					Matured debt (Series A-D)	Interest-bearing debt

¹ Includes Government corporations. Based, for the most part, on reports of respective agencies to Civil Service Commission adjusted to improve comparability throughout period. Differs from data in tables compiled by Civil Service Commission in following respects: (1) Excludes seamen and trainees on ships contracted by U. S. Maritime Commission and substitute rural mail carriers; (2) includes temporary employees of Post Office Department hired to handle Christmas mail each year, Federal Reserve banks, and mixed-ownership banks of Farm Credit Administration.

² Comparable data not available subsequently.

Source: Department of Labor, Bureau of Labor Statistics. Data for executive branch based mainly on reports of Civil Service Commission. Current data published in *Monthly Labor Review* and in mimeographed releases.

No. 405.—PAID CIVILIAN EMPLOYMENT IN THE EXECUTIVE BRANCH OF THE FEDERAL GOVERNMENT, BY AREA AND SEX: JUNE 1945 TO 1952

[Represents number in active-duty status as of last day of month. Prior to 1947, excludes seamen and trainees of U. S. Maritime Commission, and beginning 1948, excludes Central Intelligence Agency. See also *Historical Statistics*, series P 63 for earlier data on Washington, D. C., metropolitan area total]

¹ From geographic study which excluded temporary postal substitutes; distribution for June 1938 not available.² Represents peak of total employment. ³ Not available.⁴ Beginning 1950, Washington, D. C., metropolitan area includes Dist. of Columbia; Alexandria and Falls Church Cities, Arlington and Fairfax Counties, Virginia; and Montgomery and Prince Georges Counties, Maryland. In 1945, only parts of these counties were included. These areas excluded from data for 48 States.⁵ Relates to District of Columbia only.

¹ Average age is 40.6 years for all employees, 41.6 years for men, and 37.7 years for women. Age is determined by subtracting birth year from year 1947.

² Less than 0.1 percent.

³ Pay rates represent base pay before any deductions for retirement, taxes, or bonds, but exclude overtime, bonuses, night differentials, etc. Pay rates other than annual rates are converted to annual full-time equivalent.

⁴ Average length is 10.2 years for all employees, 11.3 years for men, and 7.2 years for women. Service represents all Federal employment, whether or not retirement deductions were taken from pay, and military service.

15. State and Local Government Finances and Employment

The governmental structure of the United States includes, in addition to the National Government and the 48 States, a total of nearly 117,000 distinct units of local government, created or authorized by the States. A majority of these—some 67,000—are local school districts, but there are large numbers also of county and township governments, municipalities, and numerous kinds of "special districts."

This section provides figures relating to State and local governments as such—their numbers, finances, and employment. Statistics regarding particular functions in which State and local governments have an important role are presented in other sections (for example, the sections on Education, Roads and Motor Vehicles, and Social Security and Related Programs).

The primary official source of most of these tabulations is the current Census Bureau series on *State Finances*, *City Finances*, *Governmental Finances in the United States*, and *Public Employment*. (A descriptive leaflet, *Census Bureau Publications on Governments*, is issued annually by the Bureau.) Basic information for these series is obtained mainly by mail canvass from State and local officials; however, financial data for each of the 48 State governments and the 41 cities of over 250,000 are compiled from their official records and reports by Census personnel, and classified into uniform categories for statistical reporting.

Number of governments.—The figures for governmental units shown in table 416 include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—lack this power but are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The figures exclude semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Financial data.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government amounts are for fiscal years ending on June 30 of the year specified, except for 6 States with earlier closing dates—3 in the same calendar year and 3 in the latter part of the preceding calendar year. Local government figures are for fiscal years ending in the calendar year specified, except for a few units which close their fiscal years in the succeeding January. Practically all school districts have fiscal years ending on June 30, but a majority of other local governments operate on a calendar fiscal year.

Nation-wide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States and large cities, although based upon the official records and reports of these governments, will not agree directly with amounts appearing in such original sources except where particular segments of the official accounts conform explicitly to standard Census reporting categories.

Note.—This section presents data for the most recent year or period available on March 31, 1953, when the material was organized and sent to the printer. In some instances, more recent data were added after that date.

The framework for Census statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved, as to expenditure according to the purpose of the spending, and as to debt and related borrowing and debt redemption according to the purpose (general government or utility) for which the debt was incurred.

The utility sector involves only water supply, electric, gas, and transit systems operated by local governments and liquor stores operated by 16 States and by a few local governments. The scattering of other kinds of semi-commercial activities carried on by some governments are included in the general government category.

Insurance trust amounts relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments. The general government sector comprises all activities and amounts other than those classified as utility or insurance trust in nature.

Revenue and expenditure reported for each of these sectors and in total, in the basic framework of Census statistics, represent only external transactions, and exclude transfers among agencies and funds of the government concerned. Such internal transactions are shown separately, however, in related tables.

Some of these features of Census financial data represent a change from the framework which applied to reporting for 1950 and earlier years. Pending a recasting of prior data to the new structure, financial data appearing in this section cannot in all respects be directly related to government finance series included in the volume *Historical Statistics of the United States, 1789-1945*, or to the more detailed financial data for years up to 1946 which appear in the Census publication, *Historical Review of State and Local Government Finances*.

Employment statistics.—Figures in this section regarding public employment and payrolls are primarily based upon the Census Bureau's regular mail canvass survey covering all State governments and a scientific sample of local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during the pay period ending nearest the close of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, amounts shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 189-190") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

16. Banking and Finance

MONEY AND BANKING

Banking and monetary system.—Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks and has tabulated and published summaries of these reports in detail in the *Abstract of Reports of National Banks* (now usually four times a year). The call report data are also summarized in the annual reports of the Comptroller.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit their statements of condition at the same time and in substantially the same form as national banks. These have been consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and are published in the *Member Bank Call Report* (usually four times a year) and in summary form in the *Federal Reserve Bulletin*. *Banking and Monetary Statistics*, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments. The statistics generally cover the period beginning with 1914.

Since the establishment of the Federal Deposit Insurance Corporation in 1934, insured banks not members of the Federal Reserve System have been reporting their condition for the end of June and December in the same manner as member banks, and consolidation of all these reports gives totals for all insured banks, which include nearly all commercial banks in the country. Beginning with June 30, 1947, a revised all-bank series has been tabulated twice a year by the Federal Deposit Insurance Corporation, replacing the three series previously compiled by the three Federal banking supervisory agencies. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based in part on the new all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

Statistics of the Postal Savings System, which is under the management of the Post Office Department and which performs certain banking functions, are available monthly in the *Federal Reserve Bulletin* and annually in the *Report of Operations of the Postal Savings System*.

Currency.—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

Note.—This section presents data for the most recent year or period available on March 31, 1953, when the material was organized and sent to the printer. In a few instances, more recent data were added after that date.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held idle—also some currency which, strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers and not appearing in the official gold and silver export figures. The Board of Governors of the Federal Reserve System derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury*.

Government credit agencies.—Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. The purposes and activities of the more than 20 credit agencies reflect mandates and powers given them by Congress. Some of these agencies were created to meet financial problems precipitated by the depression, others are geared to meeting certain broad social problems, particularly in the form of foreign aid and aid to housing.

Foreign loans of Government credit agencies include those of the Export-Import Bank and the Mutual Security Agency, as well as the Treasury loan to the United Kingdom, which was made in 1946-48. Credit for agricultural purposes is provided by the Rural Electrification Administration; the Commodity Credit Corporation, which makes price support loans on certain farm products; the Farmers Home Administration; and several credit agencies operating under the supervision of the Farm Credit Administration. (See table 403.) Loans for housing purposes represent largely purchases of insured and guaranteed home mortgages by the Federal National Mortgage Association from private lenders, but also include loans of the Federal Home Loan Banks to member institutions and the loans of the Public Housing Administration to local housing authorities to aid in the construction of low-cost housing. Credits extended by the Reconstruction Finance Corporation are largely to businesses.

Since the war, Congress has provided for financing a number of special programs by increasing the authority of Federal credit agencies to insure or guarantee certain types of loans made by private institutions. Most Federal guaranteeing and insurance operations are reflected in activities of the Veterans' Administration and the Federal Housing Administration.

Statistics on the assets and liabilities of Government credit agencies are published quarterly in the *Daily Statement of the United States Treasury* and in the *Treasury Bulletin*. Statistics relating to the operations of Government credit agencies are also available in reports of the individual agencies.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision

of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare and statistics on them are compiled and published by that organization. These data are combined with information on credit unions other than Federal by the Bureau of Labor Statistics and published in the *Monthly Labor Review*. (See tables 498 and 499.) Consumer credit statistics are published currently in the *Federal Reserve Bulletin*.

SAVINGS AND LIQUID ASSETS

Individuals' saving.—The Securities and Exchange Commission releases quarterly detailed estimates of individuals' saving showing the increase in liquid assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. In addition to total saving, these figures show the components contributing to it, such as changes in securities, cash, insurance, consumers' indebtedness, etc. A continuous series starting with 1940 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 471.) Annual estimates prior to 1940 were published in the *National Income Supplement to the Survey of Current Business*, July 1951, and in the issue of September 1949. The Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 470.) The Board of Governors of the Federal Reserve System releases annual data covering the distribution of liquid assets and occasional data covering positive, negative, and net savings of families, by income groups. These estimates are based on the Board's Survey of Consumer Finances, a nation-wide interview survey of private households. (See table 314, p. 286.)

Liquid asset holdings of individuals and businesses.—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency, demand deposits, time deposits, shares in savings and loan associations, and U. S. Government securities held by individuals and businesses. Separate estimates are shown for five categories of holders, and the series, which begins in December 1939, is published annually in the *Federal Reserve Bulletin*. (See table 472.)

SECURITIES MARKETS

New issues and retirement of securities.—Statistical information on new security issues has been provided for many years by the *Journal of Commerce* (since 1906), the *Commercial and Financial Chronicle* (since 1919) (see table 514), and the Standard and Poor's Corporation (since 1924). The statistics of the *Commercial and Financial Chronicle*, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis beginning with January 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. Included are issues privately placed as well as issues publicly offered, and unregistered issues as well as issues registered under the Securities Act of 1933. (See tables 512 and 515.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the *Federal Reserve Bulletin*. The Commission also publishes data from time to time on cost of flotation of securities registered under the Securities Act of 1933 and privately placed issues.

Trading in securities.—(See tables 504, 507, 508, 510.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures, reported in connection with the fees paid under Section 31 of the Securities Exchange Act of 1934, include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission, which ordinarily amount to from five to ten percent of total round-lot sales on the Exchange.

Security price averages.—Among the most widely known indices of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided into 30 industrial, 20 railroad, and 15 public utility stocks. Indices of the Standard and Poor's Corporation, available since 1918, are now based on the Wednesday closing prices of nearly 500 stocks. (See table 503.) The Securities and Exchange Commission compiles an index of weekly closing prices of 265 stocks listed on the New York Stock Exchange, comprising 37 industry groups, conforming with the Standard Industrial Classification. These indices are published in the Commission's *Statistical Bulletin*. (See table 502.)

INSURANCE

Insurance statistics.—There are no complete statistics of insurance for the United States as a whole. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers gather the only statistics approaching comprehensiveness. This situation arises primarily from the fact that the regulation of insurance and the collection of primary information on insurance are in the hands of the various States, Territories, and the District of Columbia. While insurance is now largely subject to Federal regulation, the Federal Government has not exercised its power nor has it taken any steps to collect comprehensive statistics of insurance on a national basis. Basic theory and practice are parallel throughout insurance, but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

Types of insurance.—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling in one of these three classes, though there is now a tendency in the direction of permitting insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a

miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Security.) Casualty insurers also write several unrelated kinds of insurance, including fidelity and surety bonds.

Types of insurer.—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance either as exclusive insurers or in competition with private insurers; *savings banks* write life insurance in three States.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series N 172-178") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

United States notes	288,389	285,417	247,887	322,587	320,781	318,173	318,330
Federal Reserve notes	1,402,066	3,222,913	5,163,284	22,867,459	22,760,285	23,456,018	24,605,158
Federal Reserve Bank notes	3,206	81,470	22,373	527,001	273,788	243,261	220,584
National bank notes	650,779	704,263	165,155	120,012	86,488	81,202	77,364

¹ Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

² By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15.9; grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce beginning June 1934; theretofore, based on \$20.67 per fine ounce.

³ Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$267,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

No. 448.—BANK DEBITS AND DEPOSIT TURNOVER: 1920 TO 1952

[All figures in millions of dollars. Figures represent debits or charges on books of reporting member and non-member banks of Federal Reserve System to deposit accounts of individuals, firms, and corporations, and of United States, State, county, and municipal governments, including debits to savings accounts, payments from trust accounts, and certificates of deposit paid. Excludes debits to accounts of other banks or in settlement of clearinghouse balances, payment of cashier's checks, charges to expense and miscellaneous accounts, corrections, and similar charges. See also *Historical Statistics*, series N 76-79]

¹ Coinage of domestic gold coin discontinued in 1933.

No. 452.—SILVER—PRICES, BULLION VALUE, AND RATIO TO GOLD: 1840 TO 1951

[London price converted to basis of ounce 1.000 fine and converted to American money at par of exchange through 1930; from 1931 through 1944, at current rate of exchange; beginning 1945, (London price) reported on basis of ounce 0.999 fine and converted to American money at current rate of exchange. Commercial ratio computed on basis of London quotations through 1914; thereafter, on basis of New York average price. Beginning 1934, monetary value of gold is \$35.00 per fine ounce, as against \$20.67+ in previous years. Value of fine silver (371.24 grains) in dollar computed on basis of London quotations through 1917; thereafter, on basis of New York average price. See also *Historical Statistics*, series N 183-184, for data on commercial ratio to gold and value of silver in dollar]

[All figures, except "Commercial ratio to gold," expressed in dollars]

No. 453.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1834 TO 1951

[Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942-44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1887; statistics for private banks, except for 1935, cover only banks under State supervision and those voluntarily reporting; for 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933. See also *Historical Statistics*, series N 19-34, and N 43-48]

¹ Reciprocal interbank demand balances with banks in U. S. are reported net, beginning 1942.

² Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.

³ Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.

⁴ Includes lawful reserve and exchanges for clearing house. Beginning 1936, excludes cash items not in process of collection.

⁵ Beginning 1934, includes capital notes and debentures for banks other than national.

⁶ Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.

⁷ Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.

⁸ Capital only.

⁹ U. S. Government securities only.

¹⁰ Includes State bank circulation outstanding.

¹¹ Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.

¹² Figures given under capital for 1935 include capital stock of one stock savings bank (see headnote).

¹³ Not available.

¹⁴ Includes book value of capital notes and debentures.

¹ Beginning with 1942, taxes on net income, previously included in expenses, are reported separately, and recurring depreciation on banking-house furniture and fixtures, previously included in losses and charge-offs, is included in expenses.

² Includes interest on capital notes and debentures beginning 1933, when first issued.

³ Prior to 1949, averages of amounts reported for every call date in year and final call date in preceding year. For 1949-1951 averages of amounts reported for call dates at beginning, middle, and end of year were used, plus the last-Wednesday-of-the-month figures for the 10 intervening months.

* Not available on the 13-month basis used for all member banks.

¹ Both direct and guaranteed obligations.

² Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which then amounted to \$62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which on Dec. 31, 1942, aggregated \$513,000,000.

³ Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

⁴ Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

⁵ Central reserve city banks only.

¹ For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933, table 232; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of Federal Reserve Act, which are not shown in this table, see source.

² Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

³ 1 percent on advances secured by Government obligations.

⁴ ½ percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

⁵ Advances secured to satisfaction of Federal Reserve Bank.

⁶ Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

⁷ Separate rate to banks eliminated.

¹ After deducting change in bank loans made for purpose of purchasing or carrying securities.

² Includes Armed Forces Leave bonds.

³ Less than \$50 million.

⁴ Mortgage debt to institutions on one- to four-family nonfarm dwellings.

⁵ Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. Other segments of individuals' debt have been allocated to assets to which they pertain, viz., saving in savings and loan associations, insurance and securities.

⁶ Construction of one- to four-family nonfarm dwellings less net acquisition of properties by nonindividuals. Also includes small amount of construction by nonprofit institutions.

⁷ Consumer expenditures on durable goods as estimated by Department of Commerce.

Source: Securities and Exchange Commission; data are published quarterly in a special release and in the Statistical Bulletin.

¹ Excludes figures for banks, insurance companies, savings and loan associations, nonprofit associations, foreigners, and governmental bodies and agencies.

² Estimates of demand deposit balances as they would appear on the records of depositors. They differ from figures based on bank records such as given in regular banking statistics. Depositor-record estimates are lower than bank-record estimates; for example, total demand deposits as of Dec. 31, 1951 on a holder-record basis (see table) amounted to 70.7 billion dollars while on a bank-record basis these deposits amount to 90.9 billion.

³ Private share capital in all operating savings and loan associations including private repurchaseable shares, deposits, and investment certificates.

⁴ Includes outstanding amounts of excess profits tax refund bonds beginning December 1945, and armed forces leave bonds beginning December 1947.

⁵ Includes real estate companies, finance and credit companies, insurance agencies (not carriers), investment trusts, security brokers and dealers, holding companies not otherwise classified, etc.

⁶ Includes only amounts administered by corporate trustees.

⁷ Includes holdings of farmers and professional persons.

¹ In some States number reporting is greater than total at end of year because former includes associations which, although transacting some business during year, had ceased operation by end of year.

² Estimated.

³ Fiscal year ending June 30

⁴ Federal credit unions only; no State-chartered associations in this State or area.

⁵ Fiscal year ending September 30

⁶ Excludes loans on real estate, which can be made only from surplus funds.

¹ Straight average of market prices of all taxable marketable bonds due or callable in 15 years and over; beginning April 1952, in 12 years and over.

² Prices derived from average yields on basis of a 4 percent 20-year bond based on Wednesday closing prices.

³ Based on composite of data (including industrial, utility, and railroad) and are a conversion of yield indexes, based on yield to maturity of each bond and assuming a 4 percent coupon with 20 years to maturity. From April 1937 to date, prices are averages of weekly data for 17 A1+ bonds; from January 1929 to March 1937, data based on a varying group of A1+ bonds, one price monthly (first of month) being used.

⁴ Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend. Data from Board of Governors, Federal Reserve System.

⁵ Based on Wednesday's closing prices, or last preceding sale price; indexes weighted by number of shares of each stock outstanding in base period. Number of stocks represents number currently used; continuity of series not affected by change in number.

⁶ Averages of daily closing figures. Changes have been made in stocks used at various times. However, the number of stocks has remained constant except for public utilities (see note 7).

⁷ For 20 stocks prior to June 2, 1935.

⁸ Based on prices end of month. 200 stocks used represent for the most part, an identical list, except in public utility group, which is a continuous series composed of 24 electric utilities (representing combined holding and operating electric companies prior to 1942 and operating electric companies thereafter). Data for A. T. & T. Co., included in figures for 200 stocks; excluded from utilities in order to show more clearly the trend for electric operating companies.

⁹ Includes also 15 banks and 10 insurance stocks and 1 additional public utility stock (see note 8).

Source: Department of Commerce, Office of Business Economics; *Survey of Current Business*, except as noted. (For original sources see table stub.)

No. 512.—SECURITIES—NEW SECURITIES OFFERED FOR CASH SALE, BY TYPE AND ISSUER: 1934 TO 1952

Estimated gross proceeds in millions of dollars. Gross proceeds are derived by multiplying principal amounts or number of units by offering prices, except for municipal issues where principal amount is used. Covers substantially all new issues of securities offered for cash sale in United States in amounts over \$100,000 and with terms of maturity of more than 1 year. Figures represent offerings, not actual sales. Includes issues privately placed, publicly offered, unregistered issues and those registered under Securities Act of 1933.

No. 516.—SHAREHOLDINGS OF RECORD IN REPORTING CORPORATIONS, CLASSIFIED BY TYPE OF BUSINESS: 1951

[Covers 3,964 common and preferred stocks representing close to 25 percent of all publicly owned issues, including one or more issues of virtually all larger companies. Relates to share ownership held in the United States (including shares of companies incorporated in other countries) rather than to ownership of United States corporations. Canvass covered all publicly owned corporations with stocks listed on the several exchanges, together with a large number whose stock are not listed on any exchange. Only publicly owned corporations are included; family and closely held companies of all types are excluded, as are those whose shares are restricted by agreements or options affecting their resale. Cooperative associations are also excluded. A number of companies for which data are included are not corporations in a strict sense, but their shares are comparable to those of corporations in practically all respects. For most corporations, figures apply within period between Nov. 1, 1951, and Feb. 1, 1952; for a number of companies with fiscal years ending prior to Nov. 1, figures are for an earlier date in 1951]

¹ Represents number of listings in stock transfer books (or other records). "Shareholder" thus differs from "share owner" (or stockholder) who may own shares in more than one corporation, or in more than one issue of the same corporation. See tables 518-520 for number of share owners.

² Includes holdings for buyers on margin, since they are not fully paid; and holdings of fully paid shares held mainly for convenience of the beneficial (or actual) owners who may be abroad or who for other reasons find it advantageous to have brokers retain their securities.

³ Nominees include all partnerships, individuals, and organizations created as a business convenience to appear as holders of record in behalf of the beneficial (or actual) owners. A very large portion of all nominee holdings is accounted for by fiduciaries or trust accounts.

⁴ Estimated to show how shareholdings would appear if all shareholdings were registered in the names of the actual owners rather than in the names of nominees or brokers (see notes 2 and 3). Each person with an interest in a common trust fund is counted as a separate beneficial holder.

⁵ Relates only to holdings for other brokers and dealers.

No. 518.—INDIVIDUAL SHARE OWNERS OF PUBLICLY OWNED STOCKS DISTRIBUTED BY EDUCATIONAL LEVEL: 1952

[If an individual owns shares in five stocks he is counted as one share owner, but in tables 516 and 517 he is represented by five shareholdings. Fiduciaries, institutions and foundations, and other nonindividual holders are excluded. Analysis is based on data obtained through a nation-wide field survey conducted during Jan.-Feb. 1952. This survey embraces interviews pertaining to 15,552 persons represented in a cross section of 5,000 family spending units. For an explanation of sample design and probable variability, see source publication.]

No. 528.—FIRE LOSSES, TOTAL AND PER CAPITA: 1876 TO 1951

[Amounts, except per capita, in thousands of dollars. Continental United States only. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses]

17. Business Enterprise

Statistics in this section relate in general to the place and the behavior of the business firm and business initiative in the American economy. More specifically, the data show measures of and changes in business population, corporate assets and liabilities, certain types of business income and expenditure, patents and designs, and research expenditures.

Business population and turnover.—These estimates of the Office of Business Economics (see tables 531-535) are based on data from a number of sources, particularly Bureau of the Census, Bureau of Internal Revenue, and Bureau of Old-Age and Survivors Insurance. A firm is defined here as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is counted only in that industry accounting for the highest proportion of its total employment. A self-employed person is considered a firm only if he has either one or more employees or has an established place of business. This count of business population differs from that of the Bureau of the Census which ordinarily represents a count of establishments, i. e., manufacturing plants or retail stores.

The number of new and discontinued businesses is estimated from tabulations prepared by the Bureau of Old-Age and Survivors Insurance, which show the number of employer identification numbers issued and canceled each quarter.

Business transfers represent purchases of going businesses, acquisitions of businesses through inheritance, transfers of businesses to a trustee or executor as well as changes in the form of business organization.

Information on new incorporations is collected by Dun & Bradstreet and is available monthly, by States, beginning in July 1945. The statistics include both completely new businesses which are incorporated, and changes in existing businesses from the noncorporate to the corporate form of organization, the transfer of an existing corporation to a new State, etc.

Corporate assets and liabilities.—These data are from the Bureau of Internal Revenue and the Securities and Exchange Commission. In its annual report, *Statistics of Income*, Part 2, the Bureau of Internal Revenue presents abbreviated balance sheet and income account data for all United States corporations. In a quarterly release entitled *Net Working Capital of U. S. Corporations*, the Securities and Exchange Commission publishes data on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and liabilities.

Corporation income, profits, dividends, and taxes.—The Bureau of Internal Revenue, the Office of Business Economics of the Department of Commerce, and the Board of Governors of the Federal Reserve System are the principal sources of statistics on these subjects. The statistics of these agencies overlap in many respects but are not comparable because of differing purposes of compilation.

Corporation statistics based on income tax returns are published by the Bureau of Internal Revenue in the annual *Statistics of Income*, Part 2.

Corporate data of the Office of Business Economics are from statistics on national income and product which may be found in its *Survey of Current Business*. In particular, see regular February and July monthly issues, and the 1951 *National Income Supplement*. These data are defined as required for purposes of national income estimation.

The primary sources of data for the Office of Business Economics estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns sub-

Note.—This section presents data for the most recent year or period available on April 22, 1953, when the material was organized and sent to the printer.

mitted to the Bureau of Internal Revenue and summarized in the annual report on *Statistics of Income*, Part 2. Various adjustments of the *Statistics of Income* data have been required by the national income treatment, particularly with respect to depletion, capital gain or loss, and intercorporate dividends and because the original corporate income statements do not represent the final stage of information. For details of these adjustments, see table 38 of the reports on national income and product in the *National Income Supplement* cited above. That table provides a reconciliation between the national income profit series and those reported in *Statistics of Income*.

Unincorporated enterprises.—These data also are from the national income and product statistics of the Office of Business Economics. Net income of these enterprises is a composite income share. It includes return on proprietors' investment and risk, as well as return from proprietors' own labor and any labor contributed by proprietors' families to the business.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and manner in which they are financed. Sources of funds should be equal to their uses. Certain discrepancies, however, apart from errors in estimation interfere with this equality. These discrepancies are not particularly significant and are due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment (2) transactions in securities held as permanent investments except public offerings, and (3) the fact that net new issues omit entrepreneurial capital for new corporations where no offering or sales of securities are made to the public or to institutions. Liquidation of such corporations is similarly not reflected.

Business sales and inventories.—These data include all companies, both corporate and noncorporate, major activities of which are in manufacturing or trade. Farm and other nonfarm businesses are not included. The manufacturing figures are the sum of (1) totals for corporations from Bureau of Internal Revenue *Statistics of Income* data for 1939-49 and projections of 1949 figures by means of a representative sample of manufacturing corporations for 1950-52, and (2) estimates for unincorporated enterprises projected, by means of sample data, back to 1939 and forward to 1952 from benchmarks on sole proprietorships and partnerships from Bureau of Internal Revenue for the years 1939, 1945, 1947 and 1949.

Retail and wholesale trade estimates are based on figures in 1939 and 1948 Censuses of Business, interpolated and carried forward by means of sample data, Bureau of Internal Revenue compilations, and other information.

Net change in business inventories.—To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios of current prices to base year prices. No inventory valuation adjustment is shown for farm inventories because change in farm inventories is estimated (by Bureau of Agricultural Economics) from physical quantity data.

Plant and equipment expenditures of U. S. business.—A joint survey by the Securities and Exchange Commission and the Department of Commerce presents quarterly data on actual expenditures of U. S. business, other than agriculture, and anticipated expenditure for the next two quarters. In addition, a survey is made at the beginning of each year of plans of business as regards expansion during that year. The data are based on reports submitted by corporations registered with the Securities and Exchange Commission and by a large sample of nonregistered manufacturing companies, unincorporated as well as corporate, reporting to the Department of Commerce.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 176-187") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

No. 531.—AVERAGE NUMBER OF FIRMS IN OPERATION, 1929 TO 1952, AND NEW AND DISCONTINUED BUSINESSES, 1944 TO 1952

[In thousands except new incorporations. Data are for continental United States. Excludes firms in agriculture, forestry, fishing and the professional services. New businesses include only firms which have been newly established; going concerns which have been purchased are considered business transfers. Discontinued businesses include closures of all kinds without reference to reason for discontinuing—e. g., failure, retirement, illness of proprietor, etc.]

TYPE AND STATUS OF FIRMS	All industries	Mining and quarrying	Contract construction	Manufacturing	Transportation, communication, and other public utilities	Wholesale trade	Retail trade	Finance, insurance, and real estate	Service industries

Surplus and undivided profits ⁸	61,832	48,828	61,633	83,585	101,404	113,607	122,257
Deficit ⁹	6,734	12,163	12,676	8,571	8,307	8,118	8,299
Net surplus.....	55,098	36,665	48,957	75,014	93,097	105,489	113,958

¹ Excludes returns with fragmentary balance sheet data.² Adjustments are made in tabulating data as follows: (1) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (2) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.³ Cash in till and deposits in banks.⁴ Less reserve for bad debts. Includes loans and discounts of banks.⁵ Consists of obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof, District of Columbia, and United States possessions.⁶ Less depreciation and depletion reserves. Includes land.⁷ For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."⁸ Consists of sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."⁹ Consists of negative amounts for "Earned surplus and undivided profits."Source: Treasury Department, Bureau of Internal Revenue; *Statistics of Income*, Part 2.

No. 537.—CURRENT ASSETS AND LIABILITIES OF U. S. CORPORATIONS: 1942 TO 1952

[In billions of dollars. Covers all U. S. corporations excluding banks and insurance companies. 1942-1949 based on Bureau of Internal Revenue Statistics of Income, covering virtually all corporations in United States; for 1950-52 estimated (subject to revision), based on data compiled from many different sources, including data on corporations registered with Securities and Exchange Commission. Figures as of end of specified years]

ASSETS AND LIABILITIES	1942	1943	1944	1945	1946	1947	1948	1949	1950	1951	1952

¹ Receivables from and payables to U. S. Government exclude amounts offset against each other on corporation's books or amounts arising from subcontracting which are not directly due from or to U. S. Government.² Includes marketable securities other than U. S. Government.³ Includes provisions for renegotiation other than those combined with income tax liabilities.Source: Securities and Exchange Commission; Statistical Series, *Net Working Capital of U. S. Corporations*. Data are published quarterly.

No. 538.—CORPORATION RECEIPTS, DEDUCTIONS, PROFITS, AND TAX: 1925 TO 1949

[Includes data for Alaska, District of Columbia, and Hawaii; based on income tax returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. Data represent combined totals for returns reporting net income and those reporting no net income. For number of returns, see table 386, p. 361]

[In millions of dollars]

Stock	544	414	136	140	334	701	1,025	684

¹ Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude non-taxable income other than tax-exempt interest received on certain Government obligations.

² Not available.

³ Beginning 1936, "Dividends from domestic corporations" are taxable income, tabulated with "Other receipts."

⁴ Beginning 1934, includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other receipts" for 1941-49.

⁵ Beginning 1936, includes contributions or gifts (limited to 5 percent of net income before this deduction).

⁶ Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, succession, and gift taxes; (3) income taxes paid to a foreign country or possession of United States, if any portion is claimed as a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (6) taxes reported in "Cost of goods sold" and "Cost of operations."

⁷ Tabulated with "Other deductions."

⁸ Includes amortization of emergency facilities for 1940 and later years.

⁹ Compiled receipts less compiled deductions.

¹⁰ Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-49, amount shown is before deduction due to net operating loss of prior years.

¹¹ Deducted by corporations reporting net income.

¹² In addition to income tax, includes: declared value excess-profits tax, 1933-45; defense tax, 1940; and excess profits tax under provisions of Second Revenue Act of 1940, 1940-46.

No. 540.—INCOME OF UNINCORPORATED ENTERPRISES, BY INDUSTRY: 1945 TO 1951

[In millions of dollars. Income of unincorporated enterprises measures monetary earnings and income in kind of sole proprietorships, partnerships, and producers' cooperatives from their current business operations—other than supplementary income of individuals derived from renting property. Income equals business receipts (exclusive of capital gains and expenses) less business expenses (exclusive of capital losses and depletion allowances).]

No. 541.—CORPORATE INCOME BEFORE FEDERAL AND STATE INCOME AND EXCESS PROFITS TAXES, BY INDUSTRY: 1945 TO 1951

[In millions of dollars. Corporate income before taxes, as included in national income statistics, represents earnings of corporations organized for profit which accrue to residents of the Nation, measured before Federal and State profit taxes, without deduction of depletion charges and exclusive of capital gains and losses. Profits accruing to residents are measured by eliminating intercorporate dividends from profits of domestic corporations and by adding net receipts of dividends and branch profits from abroad. In other respects, definition of profits is in accordance with Federal income tax regulations. Corporate income before taxes is measured net of capital gains and losses, dividends received, renegotiation refunds, and accelerated emergency amortization charges, but before deduction of depletion charges. Definition with respect to depletion charges has an important effect on data for mining industries.]

No. 542.—CORPORATE PROFITS, TAXES AND DIVIDENDS: 1941 TO 1952

[In billions of dollars. These series are as presented in official national income statistics. Corporate profits figures represent earnings of corporations organized for profit which accrue to residents of the Nation. (See also headnote, table 641.) They are given both before and after Federal and State taxes on corporate earnings. Disbursement of tax refunds have been deducted from tax liability in year in which tax liability was incurred. Net corporate dividend payments represent amount of cash dividends disbursed to residents of the Nation, and therefore are measured after elimination of intercorporate dividends. Undistributed corporate profits comprise difference between corporate profits after taxes and net dividend payments. Quarterly data are seasonally adjusted at annual rates]

YEAR AND QUARTER	Profits before taxes	Income tax liability	Profits after taxes	Dividends	Undistributed profits

Farm	-.3	-.3	.2	-1	-2.2	1.3	-.9	.9	.9	.6

¹ Estimates by Council of Economic Advisers; based on incomplete data.

² Items for 1945 and earlier years are not comparable with those for later years. (See notes 4 and 6.)

³ Total producers' durable equipment less "farm machinery and equipment" and farmers' purchases of tractors and business motor vehicles. These figures assume that farmers purchase 85 and 15 percent, respectively, of all tractors and motor vehicles used for productive purposes.

⁴ Industrial buildings, public utilities, gas- and oil-well drilling, warehouses, office and loft buildings, stores, restaurants, and garages. Includes hotel construction prior to 1947 only.

⁵ Farm construction (residential and nonresidential) plus "farm machinery and equipment" and farmers' purchases of tractors and business motor vehicles. (See footnote 3.)

⁶ Includes construction of hotels, tourist cabins, motor courts, and dormitories beginning 1947.

⁷ Includes religious, educational, social and recreational, hospital and institutional, miscellaneous nonresidential and all other private.

No. 549.—BUSINESS SALES AND INVENTORIES: 1940 TO 1952

[In billions of dollars. A new series on retail sales and inventories beginning in 1951 has been substituted for the series previously published. These estimates are based on a change in the method of estimation adopted by the Bureau of Census. Retail estimates are shown in this table on the previously published basis 1940-51 and on the new basis 1951 to date. For a description of the retail sales and inventories series on the new basis see *Survey of Current Business*, September and November, 1952]

No. 551.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES: 1857 TO 1952

[Excludes all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring failure record more nearly in accordance with type of concerns covered by "Total number of concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series.]

No. 552.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES, BY MONTHS: 1947 TO 1952

[Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public]

¹ Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees from 1918 to date.

² Data are for the year 1925.

³ Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. (See table 580.)

⁴ Excludes 150 trade-mark republications (under Trade-Mark Act of 1946) of trade-marks registered under prior acts for 1947; 19,730 for 1948; 12,983 for 1949; 2,053 for 1950; 1,297 for 1951; and 1,182 for 1952.

Source: Department of Commerce, United States Patent Office; records (not published elsewhere). Fiscal year figures published in *Annual Report of the Secretary*.

¹ Based on reports from 1,650 companies reporting both research cost and employment.

² Professional research staff.

³ Operating cost of all research and development divided by average employment of research engineers and scientists.

⁴ Based on reports from 1,754 companies; total including estimates for 180 companies not reporting is \$1,959,100,000.

⁵ Based on reports from 1,801 companies; total including estimates for 133 companies not reporting is \$234,000.

⁶ Based on reports from 1,795 companies; total including estimates for 139 companies not reporting is \$4,900.

Source: Department of Labor, Bureau of Labor Statistics, and Department of Defense, Research and Development Board; *Industrial Research and Development*, January 1953 (a preliminary report).

18. Communications

This section includes financial and operating data for telephone, wire-telegraph, ocean-cable, and radiotelegraph carriers, data on newspapers, periodicals, and books, and data on the postal service. Also included are financial and statistical data relating to authorized standard (AM), FM and television radio broadcast stations and networks. Additional data on communications (e. g., number of telephones on farms, radios in occupied dwelling units, and the manufacture of communication equipment) appear in other sections of this *Abstract*.

Telephone and telegraph systems.—Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been concentrated in that agency. The Commission issues annually *Statistics of the Communications Industry in the United States*, which contains most of the data shown here. Additional data may be obtained from the annual reports of the American Telephone & Telegraph Co., and the Western Union Telegraph Co. Beginning in 1902, reports on the telephone and telegraph industries covering all systems and lines have been compiled at 5-year intervals by the Bureau of the Census in the Census of Electrical Industries. The last Census was taken for the year 1937.

According to the Communications Act of 1934, as amended, only common carriers engaged in interstate, or foreign, communication service are subject to the full jurisdiction of the Commission, and are required to file annual and monthly reports. The companies controlling these carriers are also required to file annual reports. Practically all the wire-telegraph, ocean-cable, and radiotelegraph carriers are subject to the full jurisdiction of the Commission. A large number of telephone carriers engaged only in intrastate service are not fully subject to the Act. However, it is estimated that the gross operating revenues of the telephone carriers reporting annually cover over 90 percent of the revenues of all telephone carriers in the United States.

The term "system" in general is used for aggregations of lines operated by the larger companies. "Bell System" as referred to in this section, consists of the American Telephone & Telegraph Co., and its principal telephone subsidiaries.

Broadcasting.—Data are from the Federal Communications Commission. The number of broadcast stations refers to the number licensed or holding construction permits. Total broadcast revenues are defined as total time sales of all networks and stations, less commissions to agencies and plus incidental revenues, such as sale of talent, program material, etc. Reports filed with the Federal Communications Commission by radio broadcast stations and networks cover substantially all units in the industry which operate in the United States and its possessions or between the United States and foreign countries.

United States Postal Service.—Data on the postal service are obtained from the *Annual Reports of the Postmaster General*. The postal statistics, unless otherwise noted, include data for outlying Territories, possessions, etc., except the Canal Zone; the Philippine Islands are excluded for all years.

Historical statistics.—See preface and historical appendix. Tabular headnotes (as "See also *Historical Statistics*, series P 170-175") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*.

Note.—This section presents data for the most recent year or period available on April 22, 1953, when the material was organized and sent to the printer.

No. 564.—TELEPHONE SYSTEMS—SUMMARY, CLASS A CARRIERS: 1926 TO 1951

[Excludes intercompany duplications. Covers class A telephone carriers filing annual reports with F. O. C. Class A carriers are those whose average annual operating revenues exceeded \$100,000. Gross operating revenues of class A carriers (excluding intercompany duplications of Bell System) reporting in 1937 represented approximately 94 percent of revenues of all telephone carriers as reported for Census of Electrical Industries for that year. Figures include data for carriers consolidated and merged for which annual data are available]

(All money figures in thousands)

¹ Pole and wire mileages reflect acquisition on Oct. 7, 1943, of facilities of Postal Telegraph Companies.

² Excludes agency and commission offices, numbering 10,974 on Dec. 31, 1952.

³ Figures for 1915 and prior years represent net income before bond interest.

⁴ Effective Jan. 1, 1943, the Federal Communications Commission prescribed a new system of accounts for telegraph carriers, and receipts and expenses as stated above for subsequent years are not fully comparable with results for prior years.

⁵ Net income from current operations, before extraordinary adjustments of income applicable to prior years.

⁶ Excludes controlled pole lines and wires no longer recorded in plant records.

⁷ Deficit.

⁸ After extraordinary credits and charges.
